SUBJECT INDEX

Alaska

Stress-Deformation Characteristics of Alaskan Silt, Lorraine N. Fleming and James M. Duncan, GT Mar. 90 p377-393.

Analysis

Analysis of Compressibility of Sensitive Soils, T. S. Nagaraj, B. R. S. Murthy, A. Vatsala and R. C. Joshi, GT Jan. 90 p105-118.

Anchor plates

Uplift Behavior of Horizontal Anchor Plates in Sand, Edward A. Dickin, GT Nov. 88 p1300-1317.

Anisotropic soils

Ultimate Bearing-Capacity Tests on Sand with Clay Layer, Masanobu Oda and Soe Win, GT Dec. 90 p1902-1906.

Anisotropy

Response of Granular Soil Along Constant Stress Increment Ratio Path, Sik-Cheung Robert Lo and Ian Kenneth Lee, GT Mar. 90 p355-376.

Stress-Deformation Characteristics of Alaskan Silt, Lorraine N. Fleming and James M. Duncan, GT Mar. 90 p377-393.

ASCE Awards & Prizes

Monitored Decisions, Elio D'Appolonia, GT Jan. 90 p4-34.

Atterberg limits

Critical Reappraisal of Colloidal Activity of Clays, N. S. Pandian and T. S. Nagaraj, GT Feb. 90 p285-296.

Axial loads

Measured and Predicted Axial Response of 98 Piles, Jean-Louis Briaud and Larry M. Tucker, GT Sept. 88 p984-1001.

Settlement Analysis of Socketed Pile Groups, Y. K. Chow, J. T. Chin, Y. C. Kog and S. L. Lee, GT Aug. 90 p1171-1184.

Shaft Resistance of Piles in Clay, Amr S. Azzouz, Mohsen M. Baligh and Andrew J. Whittle, GT Feb. 90 p205-221.

Barrier design

Transport of Low-Concentration Contaminants in Saturated Earthen Barriers, Yalcin B. Acar and Laique Haider, GT July 90 p1031-1052.

Barriers

Transport of Low-Concentration Contaminants in Saturated Earthen Barriers, Yalcin B. Acar and Laique Haider, GT July 90 p1031-1052.

Bearing capacity

Bearing Capacity of Expanded-Base Piles in Sand, William J. Neely, GT Jan. 90 p73-87.

Bearing Capacity of Expanded-Base Piles with Compacted Concrete Shafts, William J. Neely, GT Sept. 90 p1309-1324.

Bearing Capacity of Foundations in Slopes, Donald Shields, Neil Chandler and Jacques Garnier, GT Mar. 90 p528-537.

Bearing Capacity of Shallow Foundations: Rigid versus Flexible Models, Dov Leshchinsky and Guy F. Marcozzi, GT Nov. 90 p1750-1756.

Behavior of Vibro-Driven Piles in Sand, Cumaraswamy Vipulanandan, Daniel Wong and Michael W. O'Neill, GT Aug. 90 p1190-1209.

Failure Criteria Interpretation Based on Mohr-Coulomb Friction, D. V. Griffiths, GT June 90 p986-999.

Laboratory Modeling of Vibro-Driven Piles, Michael W. O'Neill, Cumaraswamy Vipulanandan and Daniel Wong, GT Aug. 90 p1211-1230.

Ultimate Bearing Capacity of Triangular Shell Strip Footings on Sand, Adel Hanna and Mohamed Abd El-Rahman, GT Dec. 90 p1851-1863.

Ultimate Bearing-Capacity Tests on Sand with Clay Layer, Masanobu Oda and Soe Win, GT Dec. 90 p1902-1906.

Bentonite

Stabilizing Compacted Clay Against Chemical Attack, Gregory P. Broderick and David E. Daniel, GT Oct. 90 p1549-1567.

Biharmonic equations

FEM Analysis of Elastic Stress Distributions in Embankments, Yalcin B. Acar, Hassan Hilal and Mehmet T. Tumay, GT June 88 p711-718.

Blast effects

Laboratory Study of Compressional Liquefaction, George E. Veyera and Wayne A. Charlie, GT May 90 p790-804.

Blast loads

Laboratory Study of Compressional Liquefaction, George E. Veyera and Wayne A. Charlie, GT May 90 p790-804.

Blasting

Postdensification Penetration Resistance of Clean Sands, G. Mesri, T. W. Feng and J. M. Benak, GT July 90 p1095-1115.

Bored piles

Behavior of Laterally Loaded Bored Piles in Cemented Sands, Nabil F. Ismael, GT Nov. 90 p1678-1699.

Boundary conditions

One-Dimensional Loading-Rate Effects, John V. Farr, GT Jan. 90 p119-135.

SOA: Large Strain Consolidation Predictions, F. C. Townsend and M. C. McVay, GT Feb. 90 p222-243.

Boundary element method

Seismic Response of Piles to Obliquely Incident SH, SV, and P Waves, S. M. Mamoon and S. Ahmad, GT Feb. 90 p186-204.

Boundary values

Level Ground Soil-Liquefaction Analysis Using in Situ Properties: II, Kandiah Arulanandan and Kanthasamy K. Muraleetharan, GT July 88 p771-790.

Bounding surface

Foundation-Response Predictions Below Caisson-Retained Island, Victor N. Kaliakin, K. K. Muraleetharan, Yannis F. Dafalias, Leonard R. Herrmann and S. B. Shinde, GT Sept. 90 p1291-1308.

Buckling

Overturning Instability, Edmund C. Hambly, GT Apr. 90 p704-709.

Buildings

Influence of Buildings on Potential Liquefaction Damage, Kyle M. Rollins and H. Bolton Seed, GT Feb. 90 p165-185.

Bulk modulus

Hyperbolic Parameters for Compacted Soils, Marco D. Boscardin, Ernest T. Selig, Ruey-Shyan Lin and Gwo-Rong Yang, GT Jan. 90 p88-104.

Bulkheads

Bulkhead Failure Investigation and Redesign, Ross D. Rieke, John C. Crowser and W. L. Schroeder, GT Oct. 88 p1110-1125.

Caissons

Foundation-Response Predictions Below Caisson-Retained Island, Victor N. Kaliakin, K. K. Muraleetharan, Yannis F. Dafalias, Leonard R. Herrmann and S. B. Shinde, GT Sept. 90 p1291-1308.

Calcareous sand

Effective Stress Dependence of Pile Shaft Capacity in Calcareous Sand, C. Y. Lee and H. G. Poulos, GT Oct. 88 p1189-1193.

Calcareous soils

Laboratory Study on Leaching of a Calcareous Soil From Kuwait, Hasan Al-Sanad and Basel Al-Bader, GT Dec. 90 p1797-1809.

Cantilevers

Retaining Walls with Sloped Heel, Michael T. Elman and Charles F. Terry, GT Oct. 88 p1194-1199.

Cap model

Finite Strain Analysis of Pressure-Meter Test, George Z. Voyiadjis, Mehmet T. Tumay and Panos D. Kiousis, GT June 90 p1002-1007.

Capacity

Effective Stress Dependence of Pile Shaft Capacity in Calcareous Sand, C. Y. Lee and H. G. Poulos, GT Oct. 88 p1189-1193.

Case reports

Kettleman Hills Waste Landfill Slope Failure. I: Liner-System Properties, James K. Mitchell, Raymond B. Seed and H. Bolton Seed, GT Apr. 90 p647-668.

Kettleman Hills Waste Landfill Slope Failure. II: Stability Analyses, Raymond B. Seed, James K. Mitchell and H. Bolton Seed, GT Apr. 90 p669-690.

Slope Stability Analysis: Generalized Approach, Dov Leshchinsky, GT May 90 p851-867.

Cavity expansion

Finite Strain Analysis of Pressure-Meter Test, George Z. Voyiadjis, Mehmet T. Tumay and Panos D. Kiousis, GT June 90 p1002-1007.

Cementation

Behavior of Laterally Loaded Bored Piles in Cemented Sands, Nabil F. Ismael, GT Nov. 90 p1678-1699.

Geotechnical Properties of Cemented Volcanic Soil, T. D. O'Rourke and E. Crespo, GT Oct. 88 p1126-1147.

Cements

Stabilizing Compacted Clay Against Chemical Attack, Gregory P. Broderick and David E. Daniel, GT Oct. 90 p1549-1567.

Centrifuge model

Centrifugal Modeling of Drains for Slope Stabilization, Greg S. Resnick and Dobroslav Znidarčić, GT Nov. 90 p1607-1624.

Centrifuge Evaluation of Numerical Model for Clay, Robert Y. K. Liang and James K. Mitchell, GT Mar. 88 p265-283.

Extraction Forces for Offshore Foundations Under Undrained Loading, William H. Craig and Keng Chua, GT May 90 p868-884.

Modeling Free-Field Conditions in Centrifuge Models, J. A. Cheney, R. K. Brown, N. R. Dhat and O. Y. Z. Hor, GT Sept. 90 p1347-1367.

Uplift Behavior of Horizontal Anchor Plates in Sand, Edward A. Dickin, GT Nov. 88 p1300-1317.

Classification

Shale Durability Rating System Based on Loss of Shear Strength, David N. Richardson and Timothy T. Wiles, GT Dec. 90 p1864-1880.

Clay liners

Lessons Learned from Compacted Clay Liner, Bill R. Elsbury, David E. Daniel, Gregory A. Sraders and David C. Anderson, GT Nov. 90 p1641-1660.

Clay soils

Bulkhead Failure Investigation and Redesign, Ross D. Rieke, John C. Crowser and W. L. Schroeder, GT Oct. 88 p1110-1125.

Pore Pressure Behavior of K_o-Consolidated Clays, Paul W. Mayne and Harry E. Stewart, GT Nov. 88 p1340-1346.

Shaft Resistance of Model Pile in Clay, Indrasurya B. Mochtar and Tuncer B. Edil, GT Nov. 88 p1227-1244.

Study of S_u Predicted by Pressuremeter Test, Athanacios N. Nasr and Chitta R. Gangopadhyay, GT Nov. 88 p1209-1226.

Clay structure

Direct Determination of Permeability of Clay Under Embankment, S. Leroueil, M. Diene, F. Tavenas, M. Kabbaj and P. La Rochelle, GT June 88 p645-657.

Clays

Analysis of Incremental Excavation Based on Critical State Theory, Ronaldo I. Borja, GT June 90 p964-985.

Centrifuge Evaluation of Numerical Model for Clay, Robert Y. K. Liang and James K. Mitchell, GT Mar. 88 p265-283.

Critical Reappraisal of Colloidal Activity of Clays, N. S. Pandian and T. S. Nagaraj, GT Feb. 90 p285-296.

Double-Yield-Surface Cam-Clay Plasticity Model. I: Theory. H. S. Hsieh, E. Kavazanjian, Jr. and R. I. Borja, GT Sept. 90 p1381-1401.

Double-Yield-Surface Model. II: Implementation and Verification, R. I. Borja, H. S. Hsieh and E. Kavazanjian, Jr., GT Sept. 90 p1402-1421.

Effect of Disturbance on Pressuremeter Results in Clays, S. Prapaharan, J. L. Chameau, A. G. Altschaeffl and R. D. Holtz, GT Jan. 90 p35-53.

Fissure Parameters in Stiff Clays Under Compression, Luis E. Vallejo, GT Sept. 89 p1303-1317.

Foundation-Response Predictions Below Caisson-Retained Island, Victor N. Kaliakin, K. K. Muraleetharan, Yannis F. Dafalias, Leonard R. Herrmann and S. B. Shinde, GT Sept. 90 p1291-1308.

Hydrocompression Settlement of Deep Fills, Thomas L. Brandon, J. Michael Duncan and William S. Gardner, GT Oct. 90 p1536-1548.

Influence of Clods on the Hydraulic Conductivity of Compacted Clay, Craig H. Benson and David E. Daniel, GT Aug. 90 p1231-1248.

Model Prediction of Cyclic Response of Soils, D. V. Ramsamooj and A. J. Alwash, GT July 90 p1053-1072.

Modeling Field Infiltration Into Unsaturated Clay, Hywel Rhys Thomas and Stephen William Rees, GT Oct. 90 p1483-1501.

One-Dimensional Consolidation of Unsaturated Fine-Grained Soils, M. Arslan Tekinsoy and Tefaruk Haktanir, GT May 90 p838-850.

Overconsolidation Ratio of Clays from Penetration Pore Pressures, J. P. Sully, R. G. Campanella and P. K. Robertson, GT Feb. 88 p209-216.

Sedimentation of Clayey Slurry, T. S. Tan, K. Y. Yong, E. C. Leong and S. L. Lee, GT June 90 p885-898.

Settlements of Bangna-Bangpakong Highway on Soft Bangkok Clay, Dennes T. Bergado, Sayeed Ahmed, Casan L. Sampaco and A. S. Balasubramaniam, GT Jan. 90 p136-155.

Shear Stress-Strain Curve Generation from Simple Material Parameters, Jean H. Prevost and Catherine M. Keane, GT Aug. 90 p1255-1263.

Single-Hardening Model with Application to NC Clay, Poul V. Lade, GT Mar. 90 p394-414.

SOA: Large Strain Consolidation Predictions, F. C. Townsend and M. C. McVay, GT Feb. 90 p222-243.

Stabilizing Compacted Clay Against Chemical Attack, Gregory P. Broderick and David E. Daniel, GT Oct. 90 p1549-1567.

Thermoplasticity of Saturated Clays: Experimental Constitutive Study, T. Hueckel and G. Baldi, GT Dec. 90 p1778-1796.

Thermoplasticity of Saturated Soils and Shales: Constitutive Equations, T. Hueckel and M.tProject Leader Borsetto, GT Dec. 90 p1765-1777.

Unified Approach to Ground Improvement by Heavy Tamping, Kwang Wei Lo, Peng Lee Ooi and Seng-Lip Lee, GT Mar. 90 p514-527.

Climatic changes

Climate-Controlled Soil Design Parameters for Mat Foundations, R. Gordon McKeen and Lawrence D. Johnson, GT July 90 p1073-1094.

Coefficients

Settlements of Bangna-Bangpakong Highway on Soft Bangkok Clay, Dennes T. Bergado, Sayeed Ahmed, Casan L. Sampaco and A. S. Balasubramaniam, GT Jan. 90 p136-155.

Cohesionless soils

Bearing Capacity of Foundations in Slopes, Donald Shields, Neil Chandler and Jacques Garnier, GT Mar. 90 p528-537.

Cold weather construction

Finite Element Simulation of Behavior of Laterally Loaded Piles in Permafrost, A. Foriero and B. Ladanyi, GT Feb. 90 p266-284.

Collapsible soils

Sample Disturbance of Collapsible Soil, Robert W. Day, GT Jan. 90 p158-161.

Settlement and Moisture Movement in Collapsible Soils, Mostafa El-Ehwany and Sandra L. Houston, GT Oct. 90 p1521-1535.

Compacted soils

Hyperbolic Parameters for Compacted Soils, Marco D. Boscardin, Ernest T. Selig, Ruey-Shyan Lin and Gwo-Rong Yang, GT Jan. 90 p88-104.

Influence of Clods on the Hydraulic Conductivity of Compacted Clay, Craig H. Benson and David E. Daniel, GT Aug. 90 p1231-1248.

Softening of Fill Slopes Due to Moisture Infiltration, Robert W. Day and Gregory W. Axten, GT Sept. 90 p1424-1427.

Transport of Low-Concentration Contaminants in Saturated Earthen Barriers, Yalcin B. Acar and Laique Haider, GT July 90 p1031-1052.

Water Content-Density Criteria for Compacted Soil Liners, David E. Daniel and Craig H. Benson, GT Dec. 90 p1811-1830.

Compaction

Compaction Beneath Flexible Pavement Due to Traffic, Andrzej Sawicki and Waldemar Świdziński, GT Nov. 90 p1738-1743.

Consolidation and Permeability of Two Compacted Schist Saprolites, Olufemi Ogunsanwo, GT Aug. 90 p1250-1254.

Lessons Learned from Compacted Clay Liner, Bill R. Elsbury, David E. Daniel, Gregory A. Sraders and David C. Anderson, GT Nov. 90 p1641-1660.

Postdensification Penetration Resistance of Clean Sands, G. Mesri, T. W. Feng and J. M. Benak, GT July 90 p1095-1115.

Stabilizing Compacted Clay Against Chemical Attack, Gregory P. Broderick and David E. Daniel, GT Oct. 90 p1549-1567.

Variability in Compaction Control, Iraj Noorany, GT July 90 p1132-1136.

Comparative studies

Foundation Impedance Functions: Theory Versus Experiment, C. B. Crouse, Behnam Hushmand, J. Enrique Luco and H. L. Wong, GT Mar. 90 p432-449.

Composite materials

Static Response of Sands Reinforced with Randomly Distributed Fibers, Mohamad H. Maher and Donald H. Gray, GT Nov. 90 p1661-1677.

Compressibility

Analysis of Compressibility of Sensitive Soils, T. S. Nagaraj, B. R. S. Murthy, A. Vatsala and R. C. Joshi, GT Jan. 90 p105-118.

Compression

Dynamic Replacement and Mixing of Organic Soils with Sand Charges, Kwang Wei Lo, Peng Lee Ooi and Seng-Lip Lee, GT Oct. 90 p1463-1482.

Hydrocompression Settlement of Deep Fills, Thomas L. Brandon, J. Michael Duncan and William S. Gardner, GT Oct. 90 p1536-1548.

Postdensification Penetration Resistance of Clean Sands, G. Mesri, T. W. Feng and J. M. Benak, GT July 90 p1095-1115.

Compression tests

Hyperbolic Parameters for Compacted Soils, Marco D. Boscardin, Ernest T. Selig, Ruey-Shyan Lin and Gwo-Rong Yang, GT Jan. 90 p88-104.

One-Dimensional Loading-Rate Effects, John V. Farr, GT Jan. 90 p119-135.

Static Response of Sands Reinforced with Randomly Distributed Fibers, Mohamad H. Maher and Donald H. Gray, GT Nov. 90 p1661-1677.

Compressive strength

Fissure Parameters in Stiff Clays Under Compression, Luis E. Vallejo, GT Sept. 89 p1303-1317.

Computer applications

Analysis of Laterally Loaded Piles Embedded in Layered Frozen Soil, G. Scott Crowther, GT July 90 p1137-1152.

Simple Procedure for Determining Cap-Plasticity-Model Parameters, Tien-Kuen Huang and Wai-Fah Chen, GT Mar. 90 p492-513.

Computer models

Lateral Analysis of Piers Constructed on Slopes, Mohammed A. Gabr and Roy H. Borden, GT Dec. 90 p1831-1850.

Computer programs

Finite Element Simulation of Behavior of Laterally Loaded Piles in Permafrost, A. Foriero and B. Ladanyi, GT Feb. 90 p266-284.

SOA: Large Strain Consolidation Predictions, F. C. Townsend and M. C. McVay, GT Feb. 90 p222-243.

Computerized simulation

Finite Element Simulation of Behavior of Laterally Loaded Piles in Permafrost, A. Foriero and B. Ladanyi, GT Feb. 90 p266-284.

Concrete

Nonlinear Analysis of Concrete Face Rockfill Dam, Syed Khalid, Bharat Singh, G. C. Nayak and O. P. Jain, GT May 90 p822-837.

Cone penetration tests

Overconsolidation Ratio of Clays from Penetration Pore Pressures, J. P. Sully, R. G. Campanella and P. K. Robertson, GT Feb. 88 p209-216.

Conformal mapping

FEM Analysis of Elastic Stress Distributions in Embankments, Yalcin B. Acar, Hassan Hilal and Mehmet T. Tumay, GT June 88 p711-718.

Consolidation

Consolidation and Permeability of Two Compacted Schist Saprolites, Olufemi Ogunsanwo, GT Aug. 90 p1250-1254.

One-Dimensional Consolidation of Unsaturated Fine-Grained Soils, M. Arslan Tekinsoy and Tefaruk Haktanir, GT May 90 p838-850.

Settlements of Bangna-Bangpakong Highway on Soft Bangkok Clay, Dennes T. Bergado, Sayeed Ahmed, Casan L. Sampaco and A. S. Balasubramaniam, GT Jan. 90 p136-155.

Simple Procedure for Determining Cap-Plasticity-Model Parameters, Tien-Kuen Huang and Wai-Fah Chen, GT Mar. 90 p492-513.

SOA: Large Strain Consolidation Predictions, F. C. Townsend and M. C. McVay, GT Feb. 90 p222-243.

Theory of Partially Drained Piezometer Insertion, Derek Elsworth, GT June 90 p899-914.

Unified Approach to Ground Improvement by Heavy Tamping, Kwang Wei Lo, Peng Lee Ooi and Seng-Lip Lee, GT Mar. 90 p514-527.

Consolidation, soils

One-Dimensional Loading-Rate Effects, John V. Farr, GT Jan. 90 p119-135.

Pore Pressure Behavior of K_o-Consolidated Clays, Paul W. Mayne and Harry E. Stewart, GT Nov. 88 p1340-1346.

Constitutive equations

Finite Strain Analysis of Pressure-Meter Test, George Z. Voyiadjis, Mehmet T. Tumay and Panos D. Kiousis, GT June 90 p1002-1007.

Constitutive models

Analysis of Incremental Excavation Based on Critical State Theory, Ronaldo I. Borja, GT June 90 p964-985.

Constitutive Parameters Estimated by Plasticity Index, Akio Nakase, Takeshi Kamei and Osamu Kusakabe, GT July 88 p844-85.

Double-Yield-Surface Cam-Clay Plasticity Model. I: Theory, H. S. Hsieh, E. Kavazanjian, Jr. and R. I. Borja, GT Sept. 90 p1381-1401.

Double-Yield-Surface Model. II: Implementation and Verification, R. I. Borja, H. S. Hsieh and E. Kavazanjian, Jr., GT Sept. 90 p1402-1421.

One-Dimensional Loading-Rate Effects, John V. Farr, GT Jan. 90 p119-135.

Single-Hardening Model with Application to NC Clay, Poul V. Lade, GT Mar. 90 p394-414.

Constitutive relations

Centrifuge Evaluation of Numerical Model for Clay, Robert Y. K. Liang and James K. Mitchell, GT Mar. 88 p265-283.

Construction

Water Content-Density Criteria for Compacted Soil Liners, David E. Daniel and Craig H. Benson, GT Dec. 90 p1811-1830.

Contaminants

Transport of Low-Concentration Contaminants in Saturated Earthen Barriers, Yalcin B. Acar and Laique Haider, GT July 90 p1031-1052.

Continuum mechanics

One-Dimensional Loading-Rate Effects, John V. Farr, GT Jan. 90 p119-135.

Coverings

Water Content-Density Criteria for Compacted Soil Liners, David E. Daniel and Craig H. Benson, GT Dec. 90 p1811-1830.

Crack propagation

Fissure Parameters in Stiff Clays Under Compression, Luis E. Vallejo, GT Sept. 89 p1303-1317.

Prediction of Progressive Failure in Heavily Overconsolidated Slope, D. V. Ramsamooj and G. S. Lin, GT Sept. 90 p1368-1380.

Cranes

Overturning Instability, Edmund C. Hambly, GT Apr. 90 p704-709.

Creep

Double-Yield-Surface Cam-Clay Plasticity Model. I: Theory, H. S. Hsieh, E. Kavazanjian, Jr. and R. I. Borja, GT Sept. 90 p1381-1401.

Double-Yield-Surface Model. II: Implementation and Verification, R. I. Borja, H. S. Hsieh and E. Kavazanjian, Jr., GT Sept. 90 p1402-1421.

Finite Element Simulation of Behavior of Laterally Loaded Piles in Permafrost, A. Foriero and B. Ladanyi, GT Feb. 90 p266-284.

Prediction of Progressive Failure in Heavily Overconsolidated Slope, D. V. Ramsamooj and G. S. Lin, GT Sept. 90 p1368-1380.

Stress-Deformation Characteristics of Alaskan Silt, Lorraine N. Fleming and James M. Duncan, GT Mar. 90 p377-393.

Curvature

Three-Dimensional Stability Analysis of Concave Slopes in Plan View, Zhang Xing, GT June 88 p658-671.

Cyclic loads

Behavior of Friction Piles in Mexico City Clay, Alberto Jaime, Miguel P. Romo and Daniel Reséndiz, GT June 90 p915-931.

Compaction Beneath Flexible Pavement Due to Traffic, Andrzej Sawicki and Waldemar Świdziński, GT Nov. 90 p1738-1743.

Deformation Behavior of Sand Under Shear—Particulate Approach, Tzou-ShinmM.tGeotech. Engr.lEarth Sci. Dept., Lawrence Livermore Nat. Lab., Livermore, CA 94550; formerly, Prof., Dept. of Civil Engrg., Nat. Taiwan Univ., Taipei, Taiwan, Republic of China Ueng and Chung-Jung Lee, GT Nov. 90 p1625-1640.

Drained Permanent Deformation of Sand Due to Cyclic Loading, Ching S. Chang and Robert V. Whitman, GT Oct. 88 p1164-1180.

Lateral Load Behavior of Pile Group in Sand, Dan A. Brown, Clark Morrison and Lymon C. Reese, GT Nov. 88 p1261-1276.

Liquefaction and Flow Failure During Seismic Exploration, Roman D. Hryciw, Stan Vitton and Thomas G. Thomann, GT Dec. 90 p1881-1899.

Model Prediction of Cyclic Response of Soils, D. V. Ramsamooj and A. J. Alwash, GT July 90 p1053-1072.

Dam foundations

Rock Mass Characterization for Dam Foundations, Brian A. Chappell, GT Apr. 90 p625-646.

Damping

Dynamic Response of Sand Reinforced with Randomly Distributed Fibers, Mohamed H. Maher and Richard D. Woods, GT July 90 p1116-1131.

Impedances of Soil Layer with Boundary Zone, M. Novak and Y. C. Han, GT June 90 p1008-1014.

Dams, earth

La Villita Dam Response During Five Earthquakes Including Permanent Deformation, Ahmed-Waeil M. Elgamal, Ronald F. Scott, Mohamed F. Succarieh and Liping Yan, GT Oct. 90 p1443-1462.

Dams, rockfill

Nonlinear Analysis of Concrete Face Rockfill Dam, Syed Khalid, Bharat Singh, G. C. Nayak and O. P. Jain, GT May 90 p822-837.

Data collection

Bearing Capacity of Expanded-Base Piles with Compacted Concrete Shafts, William J. Neely, GT Sept. 90 p1309-1324.

Databases

Bearing Capacity of Expanded-Base Piles with Compacted Concrete Shafts, William J. Neely, GT Sept. 90 p1309-1324.

Decision making

Monitored Decisions, Elio D'Appolonia, GT Jan. 90 p4-34.

Deep foundations

Drained Uplift Capacity of Drilled Shafts Under Repeated Axial Loading, John P. Turner and Fred H. Kulhawy, GT Mar. 90 p470-491.

Deflection

Behavior of Laterally Loaded Bored Piles in Cemented Sands, Nabil F. Ismael, GT Nov. 90 p1678-1699.

Distortion of Steel Tanks Due to Settlement of Their Walls, Timothy B. D'Orazio, James M. Duncan and Roy A. Bell, GT June 89 p871-890.

Deformation

Deformation Behavior of Sand Under Shear—Particulate Approach, Tzou-ShinnM.tGeotech. Engr.lEarth Sci. Dept., Lawrence Livermore Nat. Lab., Livermore, CA 94550; formerly, Prof., Dept. of Civil Engrg., Nat. Taiwan Univ., Taipei, Taiwan, Republic of China Ueng and Chung-Jung Lee, GT Nov. 90 p1625-1640.

Deformation-Based Model for Reinforced Sand, Scott E. Shewbridge and Nicholas Sitar, GT July 90 p1153-1170.

Estimation of Subgrade Resilient Modulus from Standard Tests, E. C. Drumm, Y. Boateng-Poku and T. Johnson Pierce, GT May 90 p774-789.

Settlements of Bangna-Bangpakong Highway on Soft Bangkok Clay, Dennes T. Bergado, Sayeed Ahmed, Casan L. Sampaco and A. S. Balasubramaniam, GT Jan. 90 p136-155.

Stress-Deformation Characteristics of Alaskan Silt, Lorraine N. Fleming and James M. Duncan, GT Mar. 90 p377-393.

La Villita Dam Response During Five Earthquakes Including Permanent Deformation, Ahmed-Waeil M. Elgamal, Ronald F. Scott, Mohamed F. Succarieh and Liping Yan, GT Oct. 90 p1443-1462.

Deformation analysis

Drained Permanent Deformation of Sand Due to Cyclic Loading, Ching S. Chang and Robert V. Whitman, GT Oct. 88 p1164-1180.

Deformation modulus

Rock Mass Characterization for Dam Foundations, Brian A. Chappell, GT Apr. 90 p625-646.

Densification

Postdensification Penetration Resistance of Clean Sands, G. Mesri, T. W. Feng and J. M. Benak, GT July 90 p1095-1115.

Density

Shear Strength Characteristics of Sand-Polymer Interfaces, T. D. O'Rourke, S. J. Druschel and A. N. Netravali, GT Mar. 90 p451-469.

Steady State Testing of Loose Sands: Limiting Minimum Density, Michael F. Riemer, Raymond B. Seed, Peter G. Nicholson and Hsing-Lian Jong, GT Feb. 90 p332-337.

Water Content-Density Criteria for Compacted Soil Liners, David E. Daniel and Craig H. Benson, GT Dec. 90 p1811-1830.

Density measurement

Variability in Compaction Control, Iraj Noorany, GT July 90 p1132-1136.

Depth

Correlation Between OCR and Depth for Deep-Sea Sediments, Alex Rafalovich and Ronald C. Chaney, GT Nov. 90 p1744-1749.

Design

Hyperbolic Parameters for Compacted Soils, Marco D. Boscardin, Ernest T. Selig, Ruey-Shyan Lin and Gwo-Rong Yang, GT Jan. 90 p88-104.

Kinematical Limit Analysis for Design of Soil-Nailed Structures, Ilan Juran, George Baudrand, Khalid Farrag and Victor Elias, GT Jan. 90 p54-72.

Laboratory Testing of Filters and Slot Sizes for Relief Wells, Tarik Hadj-Hamou, Mohammed R. Tavassoli and Walter C. Sherman, GT Sept. 90 p1325-1346.

Monitored Decisions, Elio D'Appolonia, GT Jan. 90 p4-34.

One-Dimensional Consolidation With Three-Dimensional Flow for Time-Dependent Loading, K. Kurma Rao and M. Vijaya Rama Raju, GT Oct. 90 p1576-1580.

Strain Compatibility Analysis for Geosynthetics Reinforced Soil Walls, Ilan Juran, Halis M. Ider and K. Farrag, GT Feb. 90 p312-329.

Design data

Monitored Decisions, Elio D'Appolonia, GT Jan. 90 p4-34.

Design improvements

Bulkhead Failure Investigation and Redesign, Ross D. Rieke, John C. Crowser and W. L. Schroeder, GT Oct. 88 p1110-1125.

Design modifications

Monitored Decisions, Elio D'Appolonia, GT Jan. 90 p4-34.

Dilatancy

Deformation Behavior of Sand Under Shear—Particulate Approach, Tzou-ShinnM.tGeotech. Engr.lEarth Sci. Dept., Lawrence Livermore Nat. Lab., Livermore, CA 94550; formerly, Prof., Dept. of Civil Engrg., Nat. Taiwan Univ., Taipei, Taiwan, Republic of China Ueng and Chung-Jung Lee, GT Nov. 90 p1625-1640.

Response of Granular Soil Along Constant Stress Increment Ratio Path, Sik-Cheung Robert Lo and Ian Kenneth Lee, GT Mar. 90 p355-376.

Dilatometer tests

Small-Strain-Shear Modulus of Soil by Dilatometer, Roman D. Hryciw, GT Nov. 90 p1700-1716.

Discontinuities

Rock Mass Characterization for Dam Foundations, Brian A. Chappell, GT Apr. 90 p625-646.

Distortion

Distortion of Steel Tanks Due to Settlement of Their Walls, Timothy B. D'Orazio, James M. Duncan and Roy A. Bell, GT June 89 p871-890.

Disturbances

Analysis of Compressibility of Sensitive Soils, T. S. Nagaraj, B. R. S. Murthy, A. Vatsala and R. C. Joshi, GT Jan. 90 p105-118.

Effect of Disturbance on Pressuremeter Results in Clays, S. Prapaharan, J. L. Chameau, A. G. Altschaeffl and R. D. Holtz, GT Jan. 90 p35-53.

Drainage

Laboratory Study on Leaching of a Calcareous Soil From Kuwait, Hasan Al-Sanad and Basel Al-Bader, GT Dec. 90 p1797-1809.

Drained shear tests

Drained Permanent Deformation of Sand Due to Cyclic Loading, Ching S. Chang and Robert V. Whitman, GT Oct. 88 p1164-1180.

Drilled shafts

Drained Uplift Capacity of Drilled Shafts Under Repeated Axial Loading, John P. Turner and Fred H. Kulhawy, GT Mar. 90 p470-491.

Driven piles

Bearing Capacity of Expanded-Base Piles in Sand, William J. Neely, GT Jan. 90 p73-87.

Dynamic response

Dynamic Response of Sand Reinforced with Randomly Distributed Fibers, Mohamed H. Maher and Richard D. Woods, GT July 90 p1116-1131.

Impedances of Soil Layer with Boundary Zone, M. Novak and Y. C. Han, GT June 90 p1008-1014.

Stiffness Coefficients of Layered Soil Systems, A. Sridharan, N. S. V. V. S. J. Gandhi and S. Suresh, GT Apr. 90 p604-624.

Dynamic tests

Foundation Impedance Functions: Theory Versus Experiment, C. B. Crouse, Behnam Hushmand, J. Enrique Luco and H. L. Wong, GT Mar. 90 p432-449.

Dynamics

Dynamic Fluidization of Soils, R. Richards, Jr., D. G. Elms and M. Budhu, GT May 90 p740-759.

Impedances of Soil Layer with Boundary Zone, M. Novak and Y. C. Han, GT June 90 p1008-1014.

Rocking Compliance Functions for Rigid Bases Allowed to Uplift, Hideji Kawakami, GT May 90 p725-739.

Earth fills

Shale Durability Rating System Based on Loss of Shear Strength, David N. Richardson and Timothy T. Wiles, GT Dec. 90 p1864-1880.

Earth pressure

Active Earth Pressure on Walls With Base Projection, Amjad F. Barghouthi, GT Oct. 90 p1570-1575.

Dynamic Fluidization of Soils, R. Richards, Jr., D. G. Elms and M. Budhu, GT May 90 p740-759.

Pile Behavior Established from Model Tests, Robert E. Abendroth and Lowell F. Greimann, GT Apr. 90 p571-588.

Earth reinforcement

Deformation-Based Model for Reinforced Sand, Scott E. Shewbridge and Nicholas Sitar, GT July 90 p1153-1170.

Dynamic Response of Sand Reinforced with Randomly Distributed Fibers, Mohamed H. Maher and Richard D. Woods, GT July 90 p1116-1131.

Kinematical Limit Analysis for Design of Soil-Nailed Structures, Ilan Juran, George Baudrand, Khalid Farrag and Victor Elias, GT Jan. 90 p54-72.

Static Response of Sands Reinforced with Randomly Distributed Fibers, Mohamad H. Maher and Donald H. Gray, GT Nov. 90 p1661-1677.

Strain Compatibility Analysis for Geosynthetics Reinforced Soil Walls, Ilan Juran, Halis M. Ider and K. Farrag, GT Feb. 90 p312-329.

Earth structures

Analysis of Incremental Excavation Based on Critical State Theory, Ronaldo I. Borja, GT June 90 p964-985.

Earthquake damage

La Villita Dam Response During Five Earthquakes Including Permanent Deformation, Ahmed-Waeil M. Elgamal, Ronald F. Scott, Mohamed F. Succarieh and Liping Yan, GT Oct. 90 p1443-1462.

Earthquake engineering

Behavior of Friction Piles in Mexico City Clay, Alberto Jaime, Miguel P. Romo and Daniel Reséndiz, GT June 90 p915-931.

Rocking Compliance Functions for Rigid Bases Allowed to Uplift, Hideji Kawakami, GT May 90 p725-739.

Earthquake excitation

La Villita Dam Response During Five Earthquakes Including Permanent Deformation, Ahmed-Waeil M. Elgamal, Ronald F. Scott, Mohamed F. Succarieh and Liping Yan, GT Oct. 90 p1443-1462.

Earthquakes

Influence of Buildings on Potential Liquefaction Damage, Kyle M. Rollins and H. Bolton Seed, GT Feb. 90 p165-185.

Liquefaction Potential Map for Charleston, South Carolina, David J. Elton and Tarik Hadj-Hamou, GT Feb. 90 p244-265.

Rocking Compliance Functions for Rigid Bases Allowed to Uplift, Hideji Kawakami, GT May 90 p725-739.

Effective stress

Effective Stress Dependence of Pile Shaft Capacity in Calcareous Sand, C. Y. Lee and H. G. Poulos, GT Oct. 88 p1189-1193.

Elastic analysis

Analysis of Pile Groups with Variable Shaft-Load over Point-Load Ratios, José L. M. Clemente, GT Apr. 90 p692-697.

Finite Strain Analysis of Pressure-Meter Test, George Z. Voyiadjis, Mehmet T. Tumay and Panos D. Kiousis, GT June 90 p1002-1007.

Elastic properties

Estimation of Subgrade Resilient Modulus from Standard Tests, E. C. Drumm, Y. Boateng-Poku and T. Johnson Pierce, GT May 90 p774-789.

Settlements of Bangna-Bangpakong Highway on Soft Bangkok Clay, Dennes T. Bergado, Sayeed Ahmed, Casan L. Sampaco and A. S. Balasubramaniam, GT Jan. 90 p136-155.

Elasticity

Deformation-Based Model for Reinforced Sand, Scott E. Shewbridge and Nicholas Sitar, GT July 90 p1153-1170.

FEM Analysis of Elastic Stress Distributions in Embankments, Yalcin B. Acar, Hassan Hilal and Mehmet T. Tumay, GT June 88 p711-718.

Response of Granular Soil Along Constant Stress Increment Ratio Path, Sik-Cheung Robert Lo and Ian Kenneth Lee, GT Mar. 90 p355-376.

Elastoplasticity

Model Prediction of Cyclic Response of Soils, D. V. Ramsamooj and A. J. Alwash, GT July 90 p1053-1072.

Single-Hardening Model with Application to NC Clay, Poul V. Lade, GT Mar. 90 p394-414.

Embankment stability

Direct Determination of Permeability of Clay Under Embankment, S. Leroueil, M. Diene, F. Tavenas, M. Kabbaj and P. La Rochelle, GT June 88 p645-657.

Simple Procedure for Determining Cap-Plasticity-Model Parameters, Tien-Kuen Huang and Wai-Fah Chen, GT Mar. 90 p492-513.

Embankments

FEM Analysis of Elastic Stress Distributions in Embankments, Yalcin B. Acar, Hassan Hilal and Mehmet T. Tumay, GT June 88 p711-718.

Settlements of Bangna-Bangpakong Highway on Soft Bangkok Clay, Dennes T. Bergado, Sayeed Ahmed, Casan L. Sampaco and A. S. Balasubramaniam, GT Jan. 90 p136-155.

Shale Durability Rating System Based on Loss of Shear Strength, David N. Richardson and Timothy T. Wiles, GT Dec. 90 p1864-1880.

Simple Procedure for Determining Cap-Plasticity-Model Parameters, Tien-Kuen Huang and Wai-Fah Chen, GT Mar. 90 p492-513.

Embedment

Uplift Behavior of Horizontal Anchor Plates in Sand, Edward A. Dickin, GT Nov. 88 p1300-1317.

Empirical equations

Postdensification Penetration Resistance of Clean Sands, G. Mesri, T. W. Feng and J. M. Benak, GT July 90 p1095-1115.

Equilibrium methods

Three-Dimensional Stability Analysis of Concave Slopes in Plan View, Zhang Xing, GT June 88 p658-671.

Evaluation

Evaluation of In Situ Permeability Testing Methods, Neal Fernuik and Moir Haug, GT Feb. 90 p297-311.

Evaporation

Laboratory Study on Leaching of a Calcareous Soil From Kuwait, Hasan Al-Sanad and Basel Al-Bader, GT Dec. 90 p1797-1809.

Excavation

Analysis of Incremental Excavation Based on Critical State Theory, Ronaldo I. Borja, GT June 90 p964-985.

System Reliability of Slope Stability, Yoneo Oka and Tien H. Wu, GT Aug. 90 p1185-1189.

Expansion

Alternate Analysis of Pressuremeter Test, Sayed M. Sayed, GT Dec. 89 p1769-1786.

Expansive soils

Climate-Controlled Soil Design Parameters for Mat Foundations, R. Gordon McKeen and Lawrence D. Johnson, GT July 90 p1073-1094.

Experimentation

Bearing Capacity of Shallow Foundations: Rigid versus Flexible Models, Dov Leshchinsky and Guy F. Marcozzi, GT Nov. 90 p1750-1756.

One-Dimensional Consolidation of Unsaturated Fine-Grained Soils, M. Arslan Tekinsoy and Tefaruk Haktanir, GT May 90 p838-850.

Thermoplasticity of Saturated Clays: Experimental Constitutive Study, T. Hueckel and G. Baldi, GT Dec. 90 p1778-1796.

Fabrics

Deformation Behavior of Sand Under Shear—Particulate Approach, Tzou-ShinmM.tGeotech. Engr.lEarth Sci. Dept., Lawrence Livermore Nat. Lab., Livermore, CA 94550; formerly, Prof., Dept. of Civil Engrg., Nat. Taiwan Univ., Taipei, Taiwan, Republic of China Ueng and Chung-Jung Lee, GT Nov. 90 p1625-1640.

Failure load

Bearing Capacity of Expanded-Base Piles in Sand, William J. Neely, GT Jan. 90 p73-87.

Failure modes

Random Field Modeling of Foundation Failure Modes, Knut O. Ronold, GT Apr. 90 p554-570.

Failures

Failure Criteria Interpretation Based on Mohr-Coulomb Friction, D. V. Griffiths, GT June 90 p986-999.

Kettleman Hills Waste Landfill Slope Failure. I: Liner-System Properties, James K. Mitchell, Raymond B. Seed and H. Bolton Seed, GT Apr. 90 p647-668.

Kettleman Hills Waste Landfill Slope Failure. II: Stability Analyses, Raymond B. Seed, James K. Mitchell and H. Bolton Seed, GT Apr. 90 p669-690.

Shear Stress-Strain Curve Generation from Simple Material Parameters, Jean H. Prevost and Catherine M. Keane, GT Aug. 90 p1255-1263.

Simple Procedure for Determining Cap-Plasticity-Model Parameters, Tien-Kuen Huang and Wai-Fah Chen, GT Mar. 90 p492-513.

System Reliability of Slope Stability, Yoneo Oka and Tien H. Wu, GT Aug. 90 p1185-1189.

Failures, investigations

Bulkhead Failure Investigation and Redesign, Ross D. Rieke, John C. Crowser and W. L. Schroeder, GT Oct. 88 p1110-1125.

Fibers

Dynamic Response of Sand Reinforced with Randomly Distributed Fibers, Mohamed H. Maher and Richard D. Woods, GT July 90 p1116-1131.

Static Response of Sands Reinforced with Randomly Distributed Fibers, Mohamad H. Maher and Donald H. Gray, GT Nov. 90 p1661-1677.

Field investigations

Modeling Field Infiltration Into Unsaturated Clay, Hywel Rhys Thomas and Stephen William Rees, GT Oct. 90 p1483-1501.

Field tests

Behavior of Laterally Loaded Bored Piles in Cemented Sands, Nabil F. Ismael, GT Nov. 90 p1678-1699.

Climate-Controlled Soil Design Parameters for Mat Foundations, R. Gordon McKeen and Lawrence D. Johnson, GT July 90 p1073-1094.

Evaluation of In Situ Effective Shear Modulus from Dispersion Measurements, Christos Vrettos and Bernd Prange, GT Oct. 90 p1581-1585.

Evaluation of In Situ Permeability Testing Methods, Neal Fernuik and Moir Haug, GT Feb. 90 p297-311.

Lessons Learned from Compacted Clay Liner, Bill R. Elsbury, David E. Daniel, Gregory A. Sraders and David C. Anderson, GT Nov. 90 p1641-1660.

One-Dimensional Loading-Rate Effects, John V. Farr, GT Jan. 90 p119-135.

Study of S_u Predicted by Pressuremeter Test, Athanacios N. Nasr and Chitta R. Gangopadhyay, GT Nov. 88 p1209-1226.

Unified Approach to Ground Improvement by Heavy Tamping, Kwang Wei Lo, Peng Lee Ooi and Seng-Lip Lee, GT Mar. 90 p514-527.

Variability in Compaction Control, Iraj Noorany, GT July 90 p1132-1136.

Fills

Hydrocompression Settlement of Deep Fills, Thomas L. Brandon, J. Michael Duncan and William S. Gardner, GT Oct. 90 p1536-1548.

Softening of Fill Slopes Due to Moisture Infiltration, Robert W. Day and Gregory W. Axten, GT Sept. 90 p1424-1427.

Variability in Compaction Control, Iraj Noorany, GT July 90 p1132-1136.

Filters

Laboratory Testing of Filters and Slot Sizes for Relief Wells, Tarik Hadj-Hamou, Mohammed R. Tavassoli and Walter C. Sherman, GT Sept. 90 p1325-1346.

Finegrained soils

One-Dimensional Consolidation of Unsaturated Fine-Grained Soils, M. Arslan Tekinsoy and Tefaruk Haktanir, GT May 90 p838-850.

Transport of Low-Concentration Contaminants in Saturated Earthen Barriers, Yalcin B. Acar and Laique Haider, GT July 90 p1031-1052.

Finite element method

FEM Analysis of Elastic Stress Distributions in Embankments, Yalcin B. Acar, Hassan Hilal and Mehmet T. Tumay, GT June 88 p711-718.

Foundation-Response Predictions Below Caisson-Retained Island, Victor N. Kaliakin, K. K. Muraleetharan, Yannis F. Dafalias, Leonard R. Herrmann and S. B. Shinde, GT Sept. 90 p1291-1308.

Reliability Analysis of Pile Settlement, K. K. Phoon, S. T. Quek, Y. K. Chow and S. L. Lee, GT Nov. 90 p1717-1735.

Simple Procedure for Determining Cap-Plasticity-Model Parameters, Tien-Kuen Huang and Wai-Fah Chen, GT Mar. 90 p492-513.

Finite elements

Analysis of Incremental Excavation Based on Critical State Theory, Ronaldo I. Borja, GT June 90 p964-985.

Double-Yield-Surface Cam-Clay Plasticity Model. I: Theory, H. S. Hsieh, E. Kavazanjian, Jr. and R. I. Borja, GT Sept. 90 p1381-1401.

Double-Yield-Surface Model. II: Implementation and Verification, R. I. Borja, H. S. Hsieh and E. Kavazanjian, Jr., GT Sept. 90 p1402-1421.

Failure Criteria Interpretation Based on Mohr-Coulomb Friction, D. V. Griffiths, GT June 90 p986-999.

Finite Element Simulation of Behavior of Laterally Loaded Piles in Permafrost, A. Foriero and B. Ladanyi, GT Feb. 90 p266-284.

Fissures

Fissure Parameters in Stiff Clays Under Compression, Luis E. Vallejo, GT Sept. 89 p1303-1317.

Flocculation

Sedimentation of Clayey Slurry, T. S. Tan, K. Y. Yong, E. C. Leong and S. L. Lee, GT June 90 p885-898.

Flow

Loading Systems, Sample Preparation, and Liquefaction, Vincent B. DeGregorio, GT May 90 p805-821.

Fluidizing

Dynamic Fluidization of Soils, R. Richards, Jr., D. G. Elms and M. Budhu, GT May 90 p740-759.

Footings

Bearing Capacity of Expanded-Base Piles in Sand, William J. Neely, GT Jan. 90 p73-87.

Bearing Capacity of Foundations in Slopes Donald Shields, Neil Chandler and Jacques Garnier, GT Mar. 90 p528-537.

Foundation Impedance Functions: Theory Versus Experiment, C. B. Crouse, Behnam Hushmand, J. Enrique Luco and H. L. Wong, GT Mar. 90 p432-449.

Impedances of Soil Layer with Boundary Zone, M. Novak and Y. C. Han, GT June 90 p1008-1014.

Ultimate Bearing Capacity of Triangular Shell Strip Footings on Sand, Adel Hanna and Mohamed Abd El-Rahman, GT Dec. 90 p1851-1863.

Foundation design

Bearing Capacity of Foundations in Slopes, Donald Shields, Neil Chandler and Jacques Garnier, GT Mar. 90 p528-537.

Climate-Controlled Soil Design Parameters for Mat Foundations, R. Gordon McKeen and Lawrence D. Johnson, GT July 90 p1073-1094.

Drained Uplift Capacity of Drilled Shafts Under Repeated Axial Loading, John P. Turner and Fred H. Kulhawy, GT Mar. 90 p470-491.

Foundation investigations

Climate-Controlled Soil Design Parameters for Mat Foundations, R. Gordon McKeen and Lawrence D. Johnson, GT July 90 p1073-1094.

Foundation settlement

Ultimate Bearing Capacity of Triangular Shell Strip Footings on Sand, Adel Hanna and Mohamed Abd El-Rahman, GT Dec. 90 p1851-1863.

Foundations

Active Earth Pressure on Walls With Base Projection, Amjad F. Barghouthi, GT Oct. 90 p1570-1575.

Analysis of Pile Groups with Variable Shaft-Load over Point-Load Ratios, José L. M. Clemente, GT Apr. 90 p692-697.

Bearing Capacity of Foundations in Slopes, Donald Shields, Neil Chandler and Jacques Garnier, GT Mar. 90 p528-537.

Dynamic Fluidization of Soils, R. Richards, Jr., D. G. Elms and M. Budhu, GT May 90 p740-759.

Extraction Forces for Offshore Foundations Under Undrained Loading, William H. Craig and Keng Chua, GT May 90 p868-884.

Foundation Impedance Functions: Theory Versus Experiment, C. B. Crouse, Behnam Hushmand, J. Enrique Luco and H. L. Wong, GT Mar. 90 p432-449.

Overturning Instability, Edmund C. Hambly, GT Apr. 90 p704-709.

Random Field Modeling of Foundation Failure Modes, Knut O. Ronold, GT Apr. 90 p554-570.

Reliability Analysis of Tension Pile, Knut O. Ronold, GT May 90 p760-773.

Rocking Compliance Functions for Rigid Bases Allowed to Uplift, Hideji Kawakami, GT May 90 p725-739.

Fracture mechanics

Prediction of Progressive Failure in Heavily Overconsolidated Slope, D. V. Ramsamooj and G. S. Lin, GT Sept. 90 p1368-1380.

Friction

Failure Criteria Interpretation Based on Mohr-Coulomb Friction, D. V. Griffiths, GT June 90 p986-999.

Pile Behavior Established from Model Tests, Robert E. Abendroth and Lowell F. Greimann, GT Apr. 90 p571-588.

Friction piles

Behavior of Friction Piles in Mexico City Clay, Alberto Jaime, Miguel P. Romo and Daniel Reséndiz, GT June 90 p915-931.

Pile Behavior Established from Model Tests, Robert E. Abendroth and Lowell F. Greimann, GT Apr. 90 p571-588.

Shaft Resistance of Piles in Clay, Amr S. Azzouz, Mohsen M. Baligh and Andrew J. Whittle, GT Feb. 90 p205-221.

Friction resistance

Shear Strength Characteristics of Sand-Polymer Interfaces, T. D. O'Rourke, S. J. Druschel and A. N. Netravali, GT Mar. 90 p451-469.

Frozen soils

Analysis of Laterally Loaded Piles Embedded in Layered Frozen Soil, G. Scott Crowther, GT July 90 p1137-1152.

Full-scale tests

Kinematical Limit Analysis for Design of Soil-Nailed Structures, Ilan Juran, George Baudrand, Khalid Farrag and Victor Elias, GT Jan. 90 p54-72.

Lateral Analysis of Piers Constructed on Slopes, Mohammed A. Gabr and Roy H. Borden, GT Dec. 90 p1831-1850.

Functional analysis

Shear Stress-Strain Curve Generation from Simple Material Parameters, Jean H. Prevost and Catherine M. Keane, GT Aug. 90 p1255-1263.

Geology

Geotechnical Properties of Cemented Volcanic Soil, T. D. O'Rourke and E. Crespo, GT Oct. 88 p1126-1147.

Geosynthetics

Shear Strength Characteristics of Sand-Polymer Interfaces, T. D. O'Rourke, S. J. Druschel and A. N. Netravali, GT Mar. 90 p451-469.

Strain Compatibility Analysis for Geosynthetics Reinforced Soil Walls, Ilan Juran, Halis M. Ider and K. Farrag, GT Feb. 90 p312-329.

Grade separation

Particle Gradation and Liquefaction, Y. P. Vaid, J. M. Fisher, R. H. Kuerbis and D. Negussey, GT Apr. 90 p698-703.

Granular media

Deformation Behavior of Sand Under Shear—Particulate Approach, Tzou-ShinmM.tGeotech. Engr.lEarth Sci. Dept., Lawrence Livermore Nat. Lab., Livermore, CA 94550; formerly, Prof., Dept. of Civil Engrg., Nat. Taiwan Univ., Taipei, Taiwan, Republic of China Ueng and Chung-Jung Lee, GT Nov. 90 p1625-1640.

Ground anchors

Improvements in Grouting of Large Ground Anchors, A. C. Houlsby, GT Apr. 88 p448-468.

Uplift Testing of Model Anchors, Weizhi Su and Richard J. Fragaszy, GT Sept. 88 p961-983.

Ground motion

Liquefaction Potential Map for Charleston, South Carolina, David J. Elton and Tarik Hadj-Hamou, GT Feb. 90 p244-265.

Groundwater

Hydraulic Characteristics of Municipal Refuse, Issa S. Oweis, Donald A. Smith, R. Brian Ellwood and Daniel S. Greene, GT Apr. 90 p539-553.

Laboratory Study on Leaching of a Calcareous Soil From Kuwait, Hasan Al-Sanad and Basel Al-Bader, GT Dec. 90 p1797-1809.

Theory of Partially Drained Piezometer Insertion, Derek Elsworth, GT June 90 p899-914.

Transport of Low-Concentration Contaminants in Saturated Earthen Barriers, Yalcin B. Acar and Laique Haider, GT July 90 p1031-1052.

Groundwater quality

Transport of Low-Concentration Contaminants in Saturated Earthen Barriers, Yalcin B. Acar and Laique Haider, GT July 90 p1031-1052.

Grout

Effective Stress Dependence of Pile Shaft Capacity in Calcareous Sand, C. Y. Lee and H. G. Poulos, GT Oct. 88 p1189-1193.

Grouting

Improvements in Grouting of Large Ground Anchors, A. C. Houlsby, GT Apr. 88 p448-468.

Half space

Evaluation of In Situ Effective Shear Modulus from Dispersion Measurements, Christos Vrettos and Bernd Prange, GT Oct. 90 p1581-1585.

Hardness

Shear Strength Characteristics of Sand-Polymer Interfaces, T. D. O'Rourke, S. J. Druschel and A. N. Netravali, GT Mar. 90 p451-469.

Hazardous waste

Kettleman Hills Waste Landfill Slope Failure. I: Liner-System Properties, James K. Mitchell, Raymond B. Seed and H. Bolton Seed, GT Apr. 90 p647-668.

Kettleman Hills Waste Landfill Slope Failure. II: Stability Analyses, Raymond B. Seed, James K. Mitchell and H. Bolton Seed, GT Apr. 90 p669-690.

Heating

Thermoplasticity of Saturated Clays: Experimental Constitutive Study, T. Hueckel and G. Baldi, GT Dec. 90 p1778-1796.

Thermoplasticity of Saturated Soils and Shales: Constitutive Equations, T. Hueckel and M.tProject Leader Borsetto, GT Dec. 90 p1765-1777.

Highways

Settlements of Bangna-Bangpakong Highway on Soft Bangkok Clay, Dennes T. Bergado, Sayeed Ahmed, Casan L. Sampaco and A. S. Balasubramaniam, GT Jan. 90 p136-155.

Horizontal drains

Centrifugal Modeling of Drains for Slope Stabilization, Greg S. Resnick and Dobroslav Znidarčić, GT Nov. 90 p1607-1624.

Horizontal loads

Uplift Behavior of Horizontal Anchor Plates in Sand, Edward A. Dickin, GT Nov. 88 p1300-1317.

Hybrid simulation

Seismic Response of Piles to Obliquely Incident SH, SV, and P Waves, S. M. Mamoon and S. Ahmad, GT Feb. 90 p186-204.

Hydraulic conductivity

Influence of Clods on the Hydraulic Conductivity of Compacted Clay, Craig H. Benson and David E. Daniel, GT Aug. 90 p1231-1248.

Stabilizing Compacted Clay Against Chemical Attack, Gregory P. Broderick and David E. Daniel, GT Oct. 90 p1549-1567.

Transport of Low-Concentration Contaminants in Saturated Earthen Barriers, Yalcin B. Acar and Laique Haider, GT July 90 p1031-1052.

Hydraulic properties

Hydraulic Characteristics of Municipal Refuse, Issa S. Oweis, Donald A. Smith, R. Brian Ellwood and Daniel S. Greene, GT Apr. 90 p539-553.

Hydrostatic pressure

Theory of Partially Drained Piezometer Insertion, Derek Elsworth, GT June 90 p899-914.

Impact forces

Unified Approach to Ground Improvement by Heavy Tamping, Kwang Wei Lo, Peng Lee Ooi and Seng-Lip Lee, GT Mar. 90 p514-527.

Impact tests

WAK Test to Find Spread Footing Stiffness, Jean-Louis Briaud and Philippe Lepert, GT Mar. 90 p415-431.

Impedance

Foundation Impedance Functions: Theory Versus Experiment, C. B. Crouse, Behnam Hushmand, J. Enrique Luco and H. L. Wong, GT Mar. 90 p432-449.

Impedances of Soil Layer with Boundary Zone, M. Novak and Y. C. Han, GT June 90 p1008-1014.

In situ tests

Evaluation of In Situ Permeability Testing Methods, Neal Fernuik and Moir Haug, GT Feb. 90 p297-311.

Small-Strain-Shear Modulus of Soil by Dilatometer, Roman D. Hryciw, GT Nov. 90 p1700-1716.

Stiffness and Penetration Resistance of Sands Versus State Parameter, F. Carriglio, V. N. Ghionna, M. Jamiolkowski and R. Lancellotta, GT June 90 p1015-1020.

Infiltration

Modeling Field Infiltration Into Unsaturated Clay, Hywel Rhys Thomas and Stephen William Rees, GT Oct. 90 p1483-1501.

Settlement and Moisture Movement in Collapsible Soils, Mostafa El-Ehwany and Sandra L. Houston, GT Oct. 90 p1521-1535.

Interface shear

Kettleman Hills Waste Landfill Slope Failure. I: Liner-System Properties, James K. Mitchell, Raymond B. Seed and H. Bolton Seed, GT Apr. 90 p647-668.

Kettleman Hills Waste Landfill Slope Failure. II: Stability Analyses, Raymond B. Seed, James K. Mitchell and H. Bolton Seed, GT Apr. 90 p669-690.

Interfaces

Shear Strength Characteristics of Sand-Polymer Interfaces, T. D. O'Rourke, S. J. Druschel and A. N. Netravali, GT Mar. 90 p451-469.

Islands

Foundation-Response Predictions Below Caisson-Retained Island, Victor N. Kaliakin, K. K. Muraleetharan, Yannis F. Dafalias, Leonard R. Herrmann and S. B. Shinde, GT Sept. 90 p1291-1308.

Kaolin

Study of S_u Predicted by Pressuremeter Test, Athanacios N. Nasr and Chitta R. Gangopadhyay, GT Nov. 88 p1209-1226.

Kuwait

Laboratory Study on Leaching of a Calcareous Soil From Kuwait, Hasan Al-Sanad and Basel Al-Bader, GT Dec. 90 p1797-1809.

Laboratory tests

Analysis of Compressibility of Sensitive Soils, T. S. Nagaraj, B. R. S. Murthy, A. Vatsala and R. C. Joshi, GT Jan. 90 p105-118.

Behavior of Vibro-Driven Piles in Sand, Cumaraswamy Vipulanandan, Daniel Wong and Michael W. O'Neill, GT Aug. 90 p1190-1209.

Drained Uplift Capacity of Drilled Shafts Under Repeated Axial Loading, John P. Turner and Fred H. Kulhawy, GT Mar. 90 p470-491.

Dynamic Response of Sand Reinforced with Randomly Distributed Fibers, Mohamed H. Maher and Richard D. Woods, GT July 90 p1116-1131.

Evaluation of In Situ Permeability Testing Methods, Neal Fernuik and Moir Haug, GT Feb. 90 p297-311.

Fissure Parameters in Stiff Clays Under Compression, Luis E. Vallejo, GT Sept. 89 p1303-1317.

Hydrocompression Settlement of Deep Fills, Thomas L. Brandon, J. Michael Duncan and William S. Gardner, GT Oct. 90 p1536-1548.

Hyperbolic Parameters for Compacted Soils, Marco D. Boscardin, Ernest T. Selig, Ruey-Shyan Lin and Gwo-Rong Yang, GT Jan. 90 p88-104.

Kettleman Hills Waste Landfill Slope Failure. I: Liner-System Properties, James K. Mitchell, Raymond B. Seed and H. Bolton Seed, GT Apr. 90 p647-668.

Kinematical Limit Analysis for Design of Soil-Nailed Structures, Ilan Juran, George Baudrand, Khalid Farrag and Victor Elias, GT Jan. 90 p54-72.

Laboratory Study of Compressional Liquefaction, George E. Veyera and Wayne A. Charlie, GT May 90 p790-804.

Laboratory Study on Leaching of a Calcareous Soil From Kuwait, Hasan Al-Sanad and Basel Al-Bader, GT Dec. 90 p1797-1809.

Laboratory Testing of Filters and Slot Sizes for Relief Wells, Tarik Hadj-Hamou, Mohammed R. Tavassoli and Walter C. Sherman, GT Sept. 90 p1325-1346.

Minimum Undrained Strength of Two Sands, J. -M. Konrad, GT June 90 p932-947.

Sample Disturbance of Collapsible Soil, Robert W. Day, GT Jan. 90 p158-161.

Settlement and Moisture Movement in Collapsible Soils, Mostafa El-Ehwany and Sandra L. Houston, GT Oct. 90 p1521-1535.

Stiffness and Penetration Resistance of Sands Versus State Parameter, F. Carriglio, V. N. Ghionna, M. Jamiolkowski and R. Lancellotta, GT June 90 p1015-1020.

Landslides

Slope Stability Analysis: Generalized Approach, Dov Leshchinsky, GT May 90 p851-867.

Lateral loads

Analysis of Laterally Loaded Piles Embedded in Layered Frozen Soil, G. Scott Crowther, GT July 90 p1137-1152.

Behavior of Laterally Loaded Bored Piles in Cemented Sands, Nabil F. Ismael, GT Nov. 90 p1678-1699.

Finite Element Simulation of Behavior of Laterally Loaded Piles in Permafrost, A. Foriero and B. Ladanyi, GT Feb. 90 p266-284.

Lateral Analysis of Piers Constructed on Slopes, Mohammed A. Gabr and Roy H. Borden, GT Dec. 90 p1831-1850.

Lateral Load Behavior of Pile Group in Sand, Dan A. Brown, Clark Morrison and Lymon C. Reese, GT Nov. 88 p1261-1276.

Layered soils

Critical Reappraisal of Colloidal Activity of Clays, N. S. Pandian and T. S. Nagaraj, GT Feb. 90 p285-296.

Finite Element Simulation of Behavior of Laterally Loaded Piles in Permafrost, A. Foriero and B. Ladanyi, GT Feb. 90 p266-284.

Leachates

Hydraulic Characteristics of Municipal Refuse, Issa S. Oweis, Donald A. Smith, R. Brian Ellwood and Daniel S. Greene, GT Apr. 90 p539-553.

Leaching

Laboratory Study on Leaching of a Calcareous Soil From Kuwait, Hasan Al-Sanad and Basel Al-Bader, GT Dec. 90 p1797-1809.

Leveling

Level Ground Soil-Liquefaction Analysis Using in Situ Properties: II, Kandiah Arulanandan and Kanthasamy K. Muraleetharan, GT July 88 p771-790.

Lime

Stabilizing Compacted Clay Against Chemical Attack, Gregory P. Broderick and David E. Daniel, GT Oct. 90 p1549-1567.

Limit analysis

Kinematical Limit Analysis for Design of Soil-Nailed Structures, Ilan Juran, George Baudrand, Khalid Farrag and Victor Elias, GT Jan. 90 p54-72.

Limit equilibrium

Slope Stability Analysis: Generalized Approach, Dov Leshchinsky, GT May 90 p851-867.

Liners

Reliability Model for Soil Liner: Post Construction, I. Bogardi, W. E. Kelly and A. Bardossy, GT Oct. 90 p1502-1520.

Stabilizing Compacted Clay Against Chemical Attack, Gregory P. Broderick and David E. Daniel, GT Oct. 90 p1549-1567.

Water Content-Density Criteria for Compacted Soil Liners, David E. Daniel and Craig H. Benson, GT Dec. 90 p1811-1830.

Liquefaction

Dynamic Fluidization of Soils, R. Richards, Jr., D. G. Elms and M. Budhu, GT May 90 p740-759.

Influence of Buildings on Potential Liquefaction Damage, Kyle M. Rollins and H. Bolton Seed, GT Feb. 90 p165-185.

Laboratory Study of Compressional Liquefaction, George E. Veyera and Wayne A. Charlie, GT May 90 p790-804.

Level Ground Soil-Liquefaction Analysis Using in Situ Properties: II, Kandiah Arulanandan and Kanthasamy K. Muraleetharan, GT July 88 p771-790.

Liquefaction and Flow Failure During Seismic Exploration, Roman D. Hryciw, Stan Vitton and Thomas G. Thomann, GT Dec. 90 p1881-1899.

Liquefaction Potential Map for Charleston, South Carolina, David J. Elton and Tarik Hadj-Hamou, GT Feb. 90 p244-265.

Loading Systems, Sample Preparation, and Liquefaction, Vincent B. DeGregorio, GT May 90 p805-821.

Minimum Undrained Strength of Two Sands, J. -M. Konrad, GT June 90 p932-947.

Minimum Undrained Strength Versus Steady-State Strength of Sands, J. -M. Konrad, GT June 90 p948-963.

Particle Gradation and Liquefaction, Y. P. Vaid, J. M. Fisher, R. H. Kuerbis and D. Negussey, GT Apr. 90 p698-703.

Steady State Testing of Loose Sands: Limiting Minimum Density, Michael F. Riemer, Raymond B. Seed, Peter G. Nicholson and Hsing-Lian Jong, GT Feb. 90 p332-337.

Liquid limit

Critical Reappraisal of Colloidal Activity of Clays, N. S. Pandian and T. S. Nagaraj, GT Feb. 90 p285-296.

Load factors

Loading Systems, Sample Preparation, and Liquefaction, Vincent B. DeGregorio, GT May 90 p805-821.

Load tests

Bearing Capacity of Expanded-Base Piles in Sand, William J. Neely, GT Jan. 90 p73-87.

Bearing Capacity of Expanded-Base Piles with Compacted Concrete Shafts, William J. Neely, GT Sept. 90 p1309-1324.

Behavior of Friction Piles in Mexico City Clay, Alberto Jaime, Miguel P. Romo and Daniel Reséndiz, GT June 90 p915-931.

Loading Systems, Sample Preparation, and Liquefaction, Vincent B. DeGregorio, GT May 90 p805-821.

Ultimate Bearing-Capacity Tests on Sand with Clay Layer, Masanobu Oda and Soe Win, GT Dec. 90 p1902-1906.

WAK Test to Find Spread Footing Stiffness, Jean-Louis Briaud and Philippe Lepert, GT Mar. 90 p415-431.

Load transfer

Shaft Resistance of Model Pile in Clay, Indrasurya B. Mochtar and Tuncer B. Edil, GT Nov. 88 p1227-1244.

Loading

One-Dimensional Consolidation With Three-Dimensional Flow for Time-Dependent Loading, K. Kurma Rao and M. Vijaya Rama Raju, GT Oct. 90 p1576-1580.

Thermoplasticity of Saturated Soils and Shales: Constitutive Equations, T. Hueckel and M.tProject Leader Borsetto, GT Dec. 90 p1765-1777.

Loading rate

One-Dimensional Loading-Rate Effects, John V. Farr, GT Jan. 90 p119-135.

Machine foundations

Stiffness Coefficients of Layered Soil Systems, A. Sridharan, N. S. V. V. S. J. Gandhi and S. Suresh, GT Apr. 90 p604-624.

Machinery

Modeling Free-Field Conditions in Centrifuge Models, J. A. Cheney, R. K. Brown, N. R. Dhat and O. Y. Z. Hor, GT Sept. 90 p1347-1367.

Marine animals

Classification of Marine Sediments, Iraj Noorany, GT Jan. 89 p23-37.

Marine clays

Classification of Marine Sediments, Iraj Noorany, GT Jan. 89 p23-37.

Marine plants

Classification of Marine Sediments, Iraj Noorany, GT Jan. 89 p23-37.

Mat foundation design

Climate-Controlled Soil Design Parameters for Mat Foundations, R. Gordon McKeen and Lawrence D. Johnson, GT July 90 p1073-1094.

Mat foundations

Climate-Controlled Soil Design Parameters for Mat Foundations, R. Gordon McKeen and Lawrence D. Johnson, GT July 90 p1073-1094.

Materials tests

Estimation of Subgrade Resilient Modulus from Standard Tests, E. C. Drumm, Y. Boateng-Poku and T. Johnson Pierce, GT May 90 p774-789.

Measurement

Shaft Resistance of Model Pile in Clay, Indrasurya B. Mochtar and Tuncer B. Edil, GT Nov. 88 p1227-1244.

Mexico

Behavior of Friction Piles in Mexico City Clay, Alberto Jaime, Miguel P. Romo and Daniel Reséndiz, GT June 90 p915-931.

La Villita Dam Response During Five Earthquakes Including Permanent Deformation, Ahmed-Waeil M. Elgamal, Ronald F. Scott, Mohamed F. Succarieh and Liping Yan, GT Oct. 90 p1443-1462.

Mica schist

Consolidation and Permeability of Two Compacted Schist Saprolites, Olufemi Ogunsanwo, GT Aug. 90 p1250-1254.

Mixing

Dynamic Replacement and Mixing of Organic Soils with Sand Charges, Kwang Wei Lo, Peng Lee Ooi and Seng-Lip Lee, GT Oct. 90 p1463-1482.

Model tests

Bearing Capacity of Foundations in Slopes, Donald Shields, Neil Chandler and Jacques Garnier, GT Mar. 90 p528-537.

Bearing Capacity of Shallow Foundations: Rigid versus Flexible Models, Dov Leshchinsky and Guy F. Marcozzi, GT Nov. 90 p1750-1756.

Uplift Testing of Model Anchors, Weizhi Su and Richard J. Fragaszy, GT Sept. 88 p961-983.

Model verification

Model Prediction of Cyclic Response of Soils, D. V. Ramsamooj and A. J. Alwash, GT July 90 p1053-1072.

Modeling

Finite Strain Analysis of Pressure-Meter Test, George Z. Voyiadjis, Mehmet T. Tumay and Panos D. Kiousis, GT June 90 p1002-1007.

Laboratory Modeling of Vibro-Driven Piles, Michael W. O'Neill, Cumaraswamy Vipulanandan and Daniel Wong, GT Aug. 90 p1211-1230.

Reliability Model for Soil Liner: Post Construction, I. Bogardi, W. E. Kelly and A. Bardossy, GT Oct. 90 p1502-1520.

Models

Analysis of Laterally Loaded Piles Embedded in Layered Frozen Soil, G. Scott Crowther, GT July 90 p1137-1152.

Behavior of Vibro-Driven Piles in Sand, Cumaraswamy Vipulanandan, Daniel Wong and Michael W. O'Neill, GT Aug. 90 p1190-1209.

Deformation-Based Model for Reinforced Sand, Scott E. Shewbridge and Nicholas Sitar, GT July 90 p1153-1170.

Drained Uplift Capacity of Drilled Shafts Under Repeated Axial Loading, John P. Turner and Fred H. Kulhawy, GT Mar. 90 p470-491.

Effect of Disturbance on Pressuremeter Results in Clays, S. Prapaharan, J. L. Chameau, A. G. Altschaeffl and R. D. Holtz, GT Jan. 90 p35-53.

Foundation-Response Predictions Below Caisson-Retained Island, Victor N. Kaliakin, K. K. Muraleetharan, Yannis F. Dafalias, Leonard R. Herrmann and S. B. Shinde, GT Sept. 90 p1291-1308.

Kinematical Limit Analysis for Design of Soil-Nailed Structures, Ilan Juran, George Baudrand, Khalid Farrag and Victor Elias, GT Jan. 90 p54-72.

Model Prediction of Cyclic Response of Soils, D. V. Ramsamooj and A. J. Alwash, GT July 90 p1053-1072.

Pile Behavior Established from Model Tests, Robert E. Abendroth and Lowell F. Greimann, GT Apr. 90 p571-588.

Shaft Resistance of Model Pile in Clay, Indrasurya B. Mochtar and Tuncer B. Edil, GT Nov. 88 p1227-1244.

Shear Stress-Strain Curve Generation from Simple Material Parameters, Jean H. Prevost and Catherine M. Keane, GT Aug. 90 p1255-1263.

Strain Compatibility Analysis for Geosynthetics Reinforced Soil Walls, Ilan Juran, Halis M. Ider and K. Farrag, GT Feb. 90 p312-329.

Mohr-Coulomb theory

Failure Criteria Interpretation Based on Mohr-Coulomb Friction, D. V. Griffiths, GT June 90 p986-999.

Moisture content

Climate-Controlled Soil Design Parameters for Mat Foundations, R. Gordon McKeen and Lawrence D. Johnson, GT July 90 p1073-1094.

Softening of Fill Slopes Due to Moisture Infiltration, Robert W. Day and Gregory W. Axten, GT Sept. 90 p1424-1427.

Monitoring

Monitored Decisions, Elio D'Appolonia, GT Jan. 90 p4-34.

Municipal wastes

Hydraulic Characteristics of Municipal Refuse, Issa S. Oweis, Donald A. Smith, R. Brian Ellwood and Daniel S. Greene, GT Apr. 90 p539-553.

Nonlinear analysis

Alternate Analysis of Pressuremeter Test, Sayed M. Sayed, GT Dec. 89 p1769-1786.

Nonlinear Analysis of Concrete Face Rockfill Dam, Syed Khalid, Bharat Singh, G. C. Nayak and O. P. Jain, GT May 90 p822-837.

Nonlinear differential equations

One-Dimensional Consolidation of Unsaturated Fine-Grained Soils, M. Arslan Tekinsoy and Tefaruk Haktanir, GT May 90 p838-850.

Nuclear density meters

Variability in Compaction Control, Iraj Noorany, GT July 90 p1132-1136.

Numerical analysis

Compaction Beneath Flexible Pavement Due to Traffic, Andrzej Sawicki and Waldemar Świdziński, GT Nov. 90 p1738-1743.

Settlement Analysis of Socketed Pile Groups, Y. K. Chow, J. T. Chin, Y. C. Kog and S. L. Lee, GT Aug. 90 p1171-1184.

Numerical models

Centrifuge Evaluation of Numerical Model for Clay, Robert Y. K. Liang and James K. Mitchell, GT Mar. 88 p265-283.

Modeling Field Infiltration Into Unsaturated Clay, Hywel Rhys Thomas and Stephen William Rees, GT Oct. 90 p1483-1501.

SOA: Large Strain Consolidation Predictions, F. C. Townsend and M. C. McVay, GT Feb. 90 p222-243.

Oedometers

Constitutive Parameters Estimated by Plasticity Index, Akio Nakase, Takeshi Kamei and Osamu Kusakabe, GT July 88 p844-85.

Offshore structures

Extraction Forces for Offshore Foundations Under Undrained Loading, William H. Craig and Keng Chua, GT May 90 p868-884.

Overturning Instability, Edmund C. Hambly, GT Apr. 90 p704-709.

Overconsolidated clays

Prediction of Progressive Failure in Heavily Overconsolidated Slope, D. V. Ramsamooj and G. S. Lin, GT Sept. 90 p1368-1380.

Shaft Resistance of Piles in Clay, Amr S. Azzouz, Mohsen M. Baligh and Andrew J. Whittle, GT Feb. 90 p205-221.

Overconsolidated soils

Correlation Between OCR and Depth for Deep-Sea Sediments, Alex Rafalovich and Ronald C. Chaney, GT Nov. 90 p1744-1749.

Overconsolidation

Correlation Between OCR and Depth for Deep-Sea Sediments, Alex Rafalovich and Ronald C. Chaney, GT Nov. 90 p1744-1749.

Overconsolidation Ratio of Clays from Penetration Pore Pressures, J. P. Sully, R. G. Campanella and P. K. Robertson, GT Feb. 88 p209-216.

Overturning tests

Overturning Instability, Edmund C. Hambly, GT Apr. 90 p704-709.

Partially saturated soils

Settlement and Moisture Movement in Collapsible Soils, Mostafa El-Ehwany and Sandra L. Houston, GT Oct. 90 p1521-1535.

Particle size

Behavior of Vibro-Driven Piles in Sand, Cumaraswamy Vipulanandan, Daniel Wong and Michael W. O'Neill, GT Aug. 90 p1190-1209.

Laboratory Modeling of Vibro-Driven Piles, Michael W. O'Neill, Cumaraswamy Vipulanandan and Daniel Wong, GT Aug. 90 p1211-1230.

Pavements

Compaction Beneath Flexible Pavement Due to Traffic, Andrzej Sawicki and Waldemar Świdziński, GT Nov. 90 p1738-1743.

Estimation of Subgrade Resilient Modulus from Standard Tests, E. C. Drumm, Y. Boateng-Poku and T. Johnson Pierce, GT May 90 p774-789.

Peat

Dynamic Replacement and Mixing of Organic Soils with Sand Charges, Kwang Wei Lo, Peng Lee Ooi and Seng-Lip Lee, GT Oct. 90 p1463-1482.

Penetration resistance

Liquefaction Potential Map for Charleston, South Carolina, David J. Elton and Tarik Hadj-Hamou, GT Feb. 90 p244-265.

Postdensification Penetration Resistance of Clean Sands, G. Mesri, T. W. Feng and J. M. Benak, GT July 90 p1095-1115.

Stiffness and Penetration Resistance of Sands Versus State Parameter, F. Carriglio, V. N. Ghionna, M. Jamiolkowski and R. Lancellotta, GT June 90 p1015-1020.

Performance evaluation

Lessons Learned from Compacted Clay Liner, Bill R. Elsbury, David E. Daniel, Gregory A. Sraders and David C. Anderson, GT Nov. 90 p1641-1660.

Permafrost

Finite Element Simulation of Behavior of Laterally Loaded Piles in Permafrost, A. Foriero and B. Ladanyi, GT Feb. 90 p266-284.

Permeability

Consolidation and Permeability of Two Compacted Schist Saprolites, Olufemi Ogunsanwo, GT Aug. 90 p1250-1254.

Hydraulic Characteristics of Municipal Refuse, Issa S. Oweis, Donald A. Smith, R. Brian Ellwood and Daniel S. Greene, GT Apr. 90 p539-553.

Lessons Learned from Compacted Clay Liner, Bill R. Elsbury, David E. Daniel, Gregory A. Sraders and David C. Anderson, GT Nov. 90 p1641-1660.

Reliability Model for Soil Liner: Post Construction, I. Bogardi, W. E. Kelly and A. Bardossy, GT Oct. 90 p1502-1520.

Sedimentation of Clayey Slurry, T. S. Tan, K. Y. Yong, E. C. Leong and S. L. Lee, GT June 90 p885-898.

Stabilizing Compacted Clay Against Chemical Attack, Gregory P. Broderick and David E. Daniel, GT Oct. 90 p1549-1567.

Theory of Partially Drained Piezometer Insertion, Derek Elsworth, GT June 90 p899-914.

Water Content-Density Criteria for Compacted Soil Liners, David E. Daniel and Craig H. Benson, GT Dec. 90 p1811-1830.

Permeability tests

Evaluation of In Situ Permeability Testing Methods, Neal Fernuik and Moir Haug, GT Feb. 90 p297-311.

Permeameters

Evaluation of In Situ Permeability Testing Methods, Neal Fernuik and Moir Haug, GT Feb. 90 p297-311.

Piers

Foundation Impedance Functions: Theory Versus Experiment, C. B. Crouse, Behnam Hushmand, J. Enrique Luco and H. L. Wong, GT Mar. 90 p432-449.

Lateral Analysis of Piers Constructed on Slopes, Mohammed A. Gabr and Roy H. Borden, GT Dec. 90 p1831-1850.

Piezometers

Theory of Partially Drained Piezometer Insertion, Derek Elsworth, GT June 90 p899-914.

Pile foundations

Analysis of Pile Groups with Variable Shaft-Load over Point-Load Ratios, José L. M. Clemente, GT Apr. 90 p692-697.

Seismic Response of Piles to Obliquely Incident SH, SV, and P Waves, S. M. Mamoon and S. Ahmad, GT Feb. 90 p186-204.

Settlement Analysis of Socketed Pile Groups, Y. K. Chow, J. T. Chin, Y. C. Kog and S. L. Lee, GT Aug. 90 p1171-1184.

Pile groups

Analysis of Pile Groups with Variable Shaft-Load over Point-Load Ratios, José L. M. Clemente, GT Apr. 90 p692-697.

Lateral Load Behavior of Pile Group in Sand, Dan A. Brown, Clark Morrison and Lymon C. Reese, GT Nov. 88 p1261-1276.

Settlement Analysis of Socketed Pile Groups, Y. K. Chow, J. T. Chin, Y. C. Kog and S. L. Lee, GT Aug. 90 p1171-1184.

Pile hammers

Laboratory Modeling of Vibro-Driven Piles, Michael W. O'Neill, Cumaraswamy Vipulanandan and Daniel Wong, GT Aug. 90 p1211-1230.

Pile load tests

Measured and Predicted Axial Response of 98 Piles, Jean-Louis Briaud and Larry M. Tucker, GT Sept. 88 p984-1001.

Pile settlement

Analysis of Pile Groups with Variable Shaft-Load over Point-Load Ratios, José L. M. Clemente, GT Apr. 90 p692-697.

Measured and Predicted Axial Response of 98 Piles, Jean-Louis Briaud and Larry M. Tucker, GT Sept. 88 p984-1001.

Reliability Analysis of Pile Settlement, K. K. Phoon, S. T. Quek, Y. K. Chow and S. L. Lee, GT Nov. 90 p1717-1735.

Settlement Analysis of Socketed Pile Groups, Y. K. Chow, J. T. Chin, Y. C. Kog and S. L. Lee, GT Aug. 90 p1171-1184.

Pile structures

Effective Stress Dependence of Pile Shaft Capacity in Calcareous Sand, C. Y. Lee and H. G. Poulos, GT Oct. 88 p1189-1193.

Pile tests

Behavior of Friction Piles in Mexico City Clay, Alberto Jaime, Miguel P. Romo and Daniel Reséndiz, GT June 90 p915-931.

Pile Behavior Established from Model Tests, Robert E. Abendroth and Lowell F. Greimann, GT Apr. 90 p571-588.

Piles

Analysis of Laterally Loaded Piles Embedded in Layered Frozen Soil, G. Scott Crowther, GT July 90 p1137-1152.

Bearing Capacity of Expanded-Base Piles with Compacted Concrete Shafts, William J. Neely, GT Sept. 90 p1309-1324.

Behavior of Vibro-Driven Piles in Sand, Cumaraswamy Vipulanandan, Daniel Wong and Michael W. O'Neill, GT Aug. 90 p1190-1209.

Finite Element Simulation of Behavior of Laterally Loaded Piles in Permafrost, A. Foriero and B. Ladanyi, GT Feb. 90 p266-284.

Impedances of Soil Layer with Boundary Zone, M. Novak and Y. C. Han, GT June 90 p1008-1014.

Laboratory Modeling of Vibro-Driven Piles, Michael W. O'Neill, Cumaraswamy Vipulanandan and Daniel Wong, GT Aug. 90 p1211-1230.

Measured and Predicted Axial Response of 98 Piles, Jean-Louis Briaud and Larry M. Tucker, GT Sept. 88 p984-1001.

Pile Behavior Established from Model Tests, Robert E. Abendroth and Lowell F. Greimann, GT Apr. 90 p571-588.

Reliability Analysis of Tension Pile, Knut O. Ronold, GT May 90 p760-773.

Planning

Three-Dimensional Stability Analysis of Concave Slopes in Plan View, Zhang Xing, GT June 88 p658-671.

Plastic analysis

Finite Strain Analysis of Pressure-Meter Test, George Z. Voyiadjis, Mehmet T. Tumay and Panos D. Kiousis, GT June 90 p1002-1007.

Response of Granular Soil Along Constant Stress Increment Ratio Path, Sik-Cheung Robert Lo and Ian Kenneth Lee, GT Mar. 90 p355-376.

Plastic properties

Single-Hardening Model with Application to NC Clay, Poul V. Lade, GT Mar. 90 p394-414.

Plasticity

Analysis of Incremental Excavation Based on Critical State Theory, Ronaldo I. Borja, GT June 90 p964-985.

Deformation-Based Model for Reinforced Sand, Scott E. Shewbridge and Nicholas Sitar, GT July 90 p1153-1170.

Double-Yield-Surface Cam-Clay Plasticity Model. I: Theory, H. S. Hsieh, E. Kavazanjian, Jr. and R. I. Borja, GT Sept. 90 p1381-1401.

Double-Yield-Surface Model. II: Implementation and Verification, R. I. Borja, H. S. Hsieh and E. Kavazanjian, Jr., GT Sept. 90 p1402-1421.

Plasticity index

Constitutive Parameters Estimated by Plasticity Index, Akio Nakase, Takeshi Kamei and Osamu Kusakabe, GT July 88 p844-85.

Polymers

Shear Strength Characteristics of Sand-Polymer Interfaces, T. D. O'Rourke, S. J. Druschel and A. N. Netravali, GT Mar. 90 p451-469.

Ponds

SOA: Large Strain Consolidation Predictions, F. C. Townsend and M. C. McVay, GT Feb. 90 p222-243.

Pore pressure

Direct Determination of Permeability of Clay Under Embankment, S. Leroueil, M. Diene, F. Tavenas, M. Kabbaj and P. La Rochelle, GT June 88 p645-657.

Influence of Buildings on Potential Liquefaction Damage, Kyle M. Rollins and H. Bolton Seed, GT Feb. 90 p165-185.

Level Ground Soil-Liquefaction Analysis Using in Situ Properties: II, Kandiah Arulanandan and Kanthasamy K. Muraleetharan, GT July 88 p771-790.

Pore Pressure Behavior of K_o-Consolidated Clays, Paul W. Mayne and Harry E. Stewart, GT Nov. 88 p1340-1346.

Theory of Partially Drained Piezometer Insertion, Derek Elsworth, GT June 90 p899-914.

Pore pressure measurement

Overconsolidation Ratio of Clays from Penetration Pore Pressures, J. P. Sully, R. G. Campanella and P. K. Robertson, GT Feb. 88 p209-216.

Pore water

Critical Reappraisal of Colloidal Activity of Clays, N. S. Pandian and T. S. Nagaraj, GT Feb. 90 p285-296.

Pore water pressure

Laboratory Study of Compressional Liquefaction, George E. Veyera and Wayne A. Charlie, GT May 90 p790-804.

Preconsolidation pressure

Correlation Between OCR and Depth for Deep-Sea Sediments, Alex Rafalovich and Ronald C. Chaney, GT Nov. 90 p1744-1749.

Predictions

Analysis of Compressibility of Sensitive Soils, T. S. Nagaraj, B. R. S. Murthy, A. Vatsala and R. C. Joshi, GT Jan. 90 p105-118.

Prediction of Progressive Failure in Heavily Overconsolidated Slope, D. V. Ramsamooj and G. S. Lin, GT Sept. 90 p1368-1380.

SOA: Large Strain Consolidation Predictions, F. C. Townsend and M. C. McVay, GT Feb. 90 p222-243.

Pressuremeter tests

Alternate Analysis of Pressuremeter Test, Sayed M. Sayed, GT Dec. 89 p1769-1786.

Finite Strain Analysis of Pressure-Meter Test, George Z. Voyiadjis, Mehmet T. Tumay and Panos D. Kiousis, GT June 90 p1002-1007.

Study of S_u Predicted by Pressuremeter Test, Athanacios N. Nasr and Chitta R. Gangopadhyay, GT Nov. 88 p1209-1226.

Pressuremeters

Alternate Analysis of Pressuremeter Test, Sayed M. Sayed, GT Dec. 89 p1769-1786.

Effect of Disturbance on Pressuremeter Results in Clays, S. Prapaharan, J. L. Chameau, A. G. Altschaeffl and R. D. Holtz, GT Jan. 90 p35-53.

Finite Strain Analysis of Pressure-Meter Test, George Z. Voyiadjis, Mehmet T. Tumay and Panos D. Kiousis, GT June 90 p1002-1007.

Probabilistic methods

Random Field Modeling of Foundation Failure Modes, Knut O. Ronold, GT Apr. 90 p554-570.

Probabilistic models

Reliability Analysis of Tension Pile, Knut O. Ronold, GT May 90 p760-773.

Probability

Liquefaction Potential Map for Charleston, South Carolina, David J. Elton and Tarik Hadj-Hamou, GT Feb. 90 p244-265.

Reliability Analysis of Pile Settlement, K. K. Phoon, S. T. Quek, Y. K. Chow and S. L. Lee, GT Nov. 90 p1717-1735.

Progressive failure

Prediction of Progressive Failure in Heavily Overconsolidated Slope, D. V. Ramsamooj and G. S. Lin, GT Sept. 90 p1368-1380.

Project management

Monitored Decisions, Elio D'Appolonia, GT Jan. 90 p4-34.

Pumping

Hydraulic Characteristics of Municipal Refuse, Issa S. Oweis, Donald A. Smith, R. Brian Ellwood and Daniel S. Greene, GT Apr. 90 p539-553.

Pumping tests, wells

Hydraulic Characteristics of Municipal Refuse, Issa S. Oweis, Donald A. Smith, R. Brian Ellwood and Daniel S. Greene, GT Apr. 90 p539-553.

Quality control

Reliability Model for Soil Liner: Post Construction, I. Bogardi, W. E. Kelly and A. Bardossy, GT Oct. 90 p1502-1520.

Random variables

Random Field Modeling of Foundation Failure Modes, Knut O. Ronold, GT Apr. 90 p554-570.

Ratings

Shale Durability Rating System Based on Loss of Shear Strength, David N. Richardson and Timothy T. Wiles, GT Dec. 90 p1864-1880.

Ratio

Response of Granular Soil Along Constant Stress Increment Ratio Path, Sik-Cheung Robert Lo and Ian Kenneth Lee, GT Mar. 90 p355-376.

Refraction

Seismic Refraction Tests above Water Table, Guy Bonnet and Michel Meyer, GT Oct. 88 p1183-1189.

Relative density

Behavior of Vibro-Driven Piles in Sand, Cumaraswamy Vipulanandan, Daniel Wong and Michael W. O'Neill, GT Aug. 90 p1190-1209.

Laboratory Modeling of Vibro-Driven Piles, Michael W. O'Neill, Cumaraswamy Vipulanandan and Daniel Wong, GT Aug. 90 p1211-1230.

Laboratory Study on Leaching of a Calcareous Soil From Kuwait, Hasan Al-Sanad and Basel Al-Bader, GT Dec. 90 p1797-1809.

Reliability

Reliability Model for Soil Liner: Post Construction, I. Bogardi, W. E. Kelly and A. Bardossy, GT Oct. 90 p1502-1520.

Reliability analysis

Random Field Modeling of Foundation Failure Modes, Knut O. Ronold, GT Apr. 90 p554-570.

Reliability Analysis of Pile Settlement, K. K. Phoon, S. T. Quek, Y. K. Chow and S. L. Lee, GT Nov. 90 p1717-1735.

Repeated loading

Drained Uplift Capacity of Drilled Shafts Under Repeated Axial Loading, John P. Turner and Fred H. Kulhawy, GT Mar. 90 p470-491.

Residual soils

Influence of Structure and Composition on Residual Soils, Laurence D. Wesley, GT Apr. 90 p589-603.

Lateral Analysis of Piers Constructed on Slopes, Mohammed A. Gabr and Roy H. Borden, GT Dec. 90 p1831-1850.

Residual strength

Kettleman Hills Waste Landfill Slope Failure. I: Liner-System Properties, James K. Mitchell, Raymond B. Seed and H. Bolton Seed, GT Apr. 90 p647-668.

Kettleman Hills Waste Landfill Slope Failure. II: Stability Analyses, Raymond B. Seed, James K. Mitchell and H. Bolton Seed, GT Apr. 90 p669-690.

Resonance

Stiffness Coefficients of Layered Soil Systems, A. Sridharan, N. S. V. V. S. J. Gandhi and S. Suresh, GT Apr. 90 p604-624.

Resonance tests

Dynamic Response of Sand Reinforced with Randomly Distributed Fibers, Mohamed H. Maher and Richard D. Woods, GT July 90 p1116-1131.

Retaining walls

Active Earth Pressure on Walls With Base Projection, Amjad F. Barghouthi, GT Oct. 90 p1570-1575.

Retaining Walls with Sloped Heel, Michael T. Elman and Charles F. Terry, GT Oct. 88 p1194-1199.

Rheology

Strain Compatibility Analysis for Geosynthetics Reinforced Soil Walls, Ilan Juran, Halis M. Ider and K. Farrag, GT Feb. 90 p312-329.

Rock masses

Rock Mass Characterization for Dam Foundations, Brian A. Chappell, GT Apr. 90 p625-646.

Rock properties

Rock Mass Characterization for Dam Foundations, Brian A. Chappell, GT Apr. 90 p625-646.

Rockfill dam construction

Nonlinear Analysis of Concrete Face Rockfill Dam, Syed Khalid, Bharat Singh, G. C. Nayak and O. P. Jain, GT May 90 p822-837.

Safety analysis

Overturning Instability, Edmund C. Hambly, GT Apr. 90 p704-709.

Slope Stability Analysis: Generalized Approach, Dov Leshchinsky, GT May 90 p851-867.

Salinity

Laboratory Study on Leaching of a Calcareous Soil From Kuwait, Hasan Al-Sanad and Basel Al-Bader, GT Dec. 90 p1797-1809.

Sample disturbance

Sample Disturbance of Collapsible Soil, Robert W. Day, GT Jan. 90 p158-161.

Samples

Loading Systems, Sample Preparation, and Liquefaction, Vincent B. DeGregorio, GT May 90 p805-821.

Sand

Bearing Capacity of Expanded-Base Piles in Sand, William J. Neely, GT Jan. 90 p73-87.

Bearing Capacity of Expanded-Base Piles with Compacted Concrete Shafts, William J. Neely, GT Sept. 90 p1309-1324.

Behavior of Laterally Loaded Bored Piles in Cemented Sands, Nabil F. Ismael, GT Nov. 90 p1678-1699.

Behavior of Vibro-Driven Piles in Sand, Cumaraswamy Vipulanandan, Daniel Wong and Michael W. O'Neill, GT Aug. 90 p1190-1209.

Deformation Behavior of Sand Under Shear—Particulate Approach, Tzou-ShinmM.tGeotech. Engr.lEarth Sci. Dept., Lawrence Livermore Nat. Lab., Livermore, CA 94550; formerly, Prof., Dept. of Civil Engrg., Nat. Taiwan Univ., Taipei, Taiwan, Republic of China Ueng and Chung-Jung Lee, GT Nov. 90 p1625-1640.

Drained Permanent Deformation of Sand Due to Cyclic Loading, Ching S. Chang and Robert V. Whitman, GT Oct. 88 p1164-1180.

Dynamic Fluidization of Soils, R. Richards, Jr., D. G. Elms and M. Budhu, GT May 90 p740-759.

Dynamic Replacement and Mixing of Organic Soils with Sand Charges, Kwang Wei Lo, Peng Lee Ooi and Seng-Lip Lee, GT Oct. 90 p1463-1482.

Laboratory Modeling of Vibro-Driven Piles, Michael W. O'Neill, Cumaraswamy Vipulanandan and Daniel Wong, GT Aug. 90 p1211-1230.

Lateral Load Behavior of Pile Group in Sand, Dan A. Brown, Clark Morrison and Lymon C. Reese, GT Nov. 88 p1261-1276.

Loading Systems, Sample Preparation, and Liquefaction, Vincent B. DeGregorio, GT May 90 p805-821.

Minimum Undrained Strength of Two Sands, J. -M. Konrad, GT June 90 p932-947.

Minimum Undrained Strength Versus Steady-State Strength of Sands, J. -M. Konrad, GT June 90 p948-963.

Particle Gradation and Liquefaction, Y. P. Vaid, J. M. Fisher, R. H. Kuerbis and D. Negussey, GT Apr. 90 p698-703.

Postdensification Penetration Resistance of Clean Sands, G. Mesri, T. W. Feng and J. M. Benak, GT July 90 p1095-1115.

Shear Strength Characteristics of Sand-Polymer Interfaces, T. D. O'Rourke, S. J. Druschel and A. N. Netravali, GT Mar. 90 p451-469.

Shear Stress-Strain Curve Generation from Simple Material Parameters, Jean H. Prevost and Catherine M. Keane, GT Aug. 90 p1255-1263.

Stiffness and Penetration Resistance of Sands Versus State Parameter, F. Carriglio, V. N. Ghionna, M. Jamiolkowski and R. Lancellotta, GT June 90 p1015-1020.

Ultimate Bearing Capacity of Triangular Shell Strip Footings on Sand, Adel Hanna and Mohamed Abd El-Rahman, GT Dec. 90 p1851-1863.

Ultimate Bearing-Capacity Tests on Sand with Clay Layer, Masanobu Oda and Soe Win, GT Dec. 90 p1902-1906.

Uplift Behavior of Horizontal Anchor Plates in Sand, Edward A. Dickin, GT Nov. 88 p1300-1317.

Uplift Testing of Model Anchors, Weizhi Su and Richard J. Fragaszy, GT Sept. 88 p961-983.

WAK Test to Find Spread Footing Stiffness, Jean-Louis Briaud and Philippe Lepert, GT Mar. 90 p415-431.

Sea floor

Classification of Marine Sediments, Iraj Noorany, GT Jan. 89 p23-37.

Correlation Between OCR and Depth for Deep-Sea Sediments, Alex Rafalovich and Ronald C. Chaney, GT Nov. 90 p1744-1749.

Foundation-Response Predictions Below Caisson-Retained Island, Victor N. Kaliakin, K. K. Muraleetharan, Yannis F. Dafalias, Leonard R. Herrmann and S. B. Shinde, GT Sept. 90 p1291-1308.

Sediment

Classification of Marine Sediments, Iraj Noorany, GT Jan. 89 p23-37.

Correlation Between OCR and Depth for Deep-Sea Sediments, Alex Rafalovich and Ronald C. Chaney, GT Nov. 90 p1744-1749.

Influence of Structure and Composition on Residual Soils, Laurence D. Wesley, GT Apr. 90 p589-603.

Study of S_u Predicted by Pressuremeter Test, Athanacios N. Nasr and Chitta R. Gangopadhyay, GT Nov. 88 p1209-1226.

Sedimentation

Sedimentation of Clayey Slurry, T. S. Tan, K. Y. Yong, E. C. Leong and S. L. Lee, GT June 90 p885-898.

Seepage

Centrifugal Modeling of Drains for Slope Stabilization, Greg S. Resnick and Dobroslav Znidarčić, GT Nov. 90 p1607-1624.

Seismic analysis

Liquefaction Potential Map for Charleston, South Carolina, David J. Elton and Tarik Hadj-Hamou, GT Feb. 90 p244-265.

Seismic response

Dynamic Fluidization of Soils, R. Richards, Jr., D. G. Elms and M. Budhu, GT May 90 p740-759.

Liquefaction and Flow Failure During Seismic Exploration, Roman D. Hryciw, Stan Vitton and Thomas G. Thomann, GT Dec. 90 p1881-1899.

Seismic Response of Piles to Obliquely Incident SH, SV, and P Waves, S. M. Mamoon and S. Ahmad, GT Feb. 90 p186-204.

La Villita Dam Response During Five Earthquakes Including Permanent Deformation, Ahmed-Waeil M. Elgamal, Ronald F. Scott, Mohamed F. Succarieh and Liping Yan, GT Oct. 90 p1443-1462.

Seismic tests

Seismic Refraction Tests above Water Table, Guy Bonnet and Michel Meyer, GT Oct. 88 p1183-1189.

Serviceability

Reliability Analysis of Pile Settlement, K. K. Phoon, S. T. Quek, Y. K. Chow and S. L. Lee, GT Nov. 90 p1717-1735.

Settlement analysis

Direct Determination of Permeability of Clay Under Embankment, S. Leroueil, M. Diene, F. Tavenas, M. Kabbaj and P. La Rochelle, GT June 88 p645-657.

Distortion of Steel Tanks Due to Settlement of Their Walls, Timothy B. D'Orazio, James M. Duncan and Roy A. Bell, GT June 89 p871-890.

Hydrocompression Settlement of Deep Fills, Thomas L. Brandon, J. Michael Duncan and William S. Gardner, GT Oct. 90 p1536-1548.

Sedimentation of Clayey Slurry, T. S. Tan, K. Y. Yong, E. C. Leong and S. L. Lee, GT June 90 p885-898.

Settlement and Moisture Movement in Collapsible Soils, Mostafa El-Ehwany and Sandra L. Houston, GT Oct. 90 p1521-1535.

Settlements of Bangna-Bangpakong Highway on Soft Bangkok Clay, Dennes T. Bergado, Sayeed Ahmed, Casan L. Sampaco and A. S. Balasubramaniam, GT Jan. 90 p136-155.

Settlement control

One-Dimensional Consolidation of Unsaturated Fine-Grained Soils, M. Arslan Tekinsoy and Tefaruk Haktanir, GT May 90 p838-850.

Shaft resistance, piles

Effective Stress Dependence of Pile Shaft Capacity in Calcareous Sand, C. Y. Lee and H. G. Poulos, GT Oct. 88 p1189-1193.

Shaft Resistance of Model Pile in Clay, Indrasurya B. Mochtar and Tuncer B. Edil, GT Nov. 88 p1227-1244.

Shaft Resistance of Piles in Clay, Amr S. Azzouz, Mohsen M. Baligh and Andrew J. Whittle, GT Feb. 90 p205-221.

Shale

Fissure Parameters in Stiff Clays Under Compression, Luis E. Vallejo, GT Sept. 89 p1303-1317.

Shale Durability Rating System Based on Loss of Shear Strength, David N. Richardson and Timothy T. Wiles, GT Dec. 90 p1864-1880.

Thermoplasticity of Saturated Soils and Shales: Constitutive Equations, T. Hueckel and M.tProject Leader Borsetto, GT Dec. 90 p1765-1777.

Shallow foundations

Bearing Capacity of Shallow Foundations: Rigid versus Flexible Models, Dov Leshchinsky and Guy F. Marcozzi, GT Nov. 90 p1750-1756.

WAK Test to Find Spread Footing Stiffness, Jean-Louis Briaud and Philippe Lepert, GT Mar. 90 p415-431.

Shallow water

Seismic Refraction Tests above Water Table, Guy Bonnet and Michel Meyer, GT Oct. 88 p1183-1189.

Shear

Active Earth Pressure on Walls With Base Projection, Amjad F. Barghouthi, GT Oct. 90 p1570-1575.

Shear forces

Kinematical Limit Analysis for Design of Soil-Nailed Structures, Ilan Juran, George Baudrand, Khalid Farrag and Victor Elias, GT Jan. 90 p54-72.

Shear modulus

Dynamic Response of Sand Reinforced with Randomly Distributed Fibers, Mohamed H. Maher and Richard D. Woods, GT July 90 p1116-1131.

Evaluation of In Situ Effective Shear Modulus from Dispersion Measurements, Christos Vrettos and Bernd Prange, GT Oct. 90 p1581-1585.

Postdensification Penetration Resistance of Clean Sands, G. Mesri, T. W. Feng and J. M. Benak, GT July 90 p1095-1115.

Small-Strain-Shear Modulus of Soil by Dilatometer, Roman D. Hryciw, GT Nov. 90 p1700-1716.

Stiffness Coefficients of Layered Soil Systems, A. Sridharan, N. S. V. V. S. J. Gandhi and S. Suresh, GT Apr. 90 p604-624.

Shear strain

Liquefaction and Flow Failure During Seismic Exploration, Roman D. Hryciw, Stan Vitton and Thomas G. Thomann, GT Dec. 90 p1881-1899.

Shear Stress-Strain Curve Generation from Simple Material Parameters, Jean H. Prevost and Catherine M. Keane, GT Aug. 90 p1255-1263.

Shear strength

Deformation-Based Model for Reinforced Sand, Scott E. Shewbridge and Nicholas Sitar, GT July 90 p1153-1170.

Effect of Disturbance on Pressuremeter Results in Clays, S. Prapaharan, J. L. Chameau, A. G. Altschaeffl and R. D. Holtz, GT Jan. 90 p35-53.

Estimation of Subgrade Resilient Modulus from Standard Tests, E. C. Drumm, Y. Boateng-Poku and T. Johnson Pierce, GT May 90 p774-789.

Settlements of Bangna-Bangpakong Highway on Soft Bangkok Clay, Dennes T. Bergado, Sayeed Ahmed, Casan L. Sampaco and A. S. Balasubramaniam, GT Jan. 90 p136-155.

Shale Durability Rating System Based on Loss of Shear Strength, David N. Richardson and Timothy T. Wiles, GT Dec. 90 p1864-1880.

Shear Strength Characteristics of Sand-Polymer Interfaces, T. D. O'Rourke, S. J. Druschel and A. N. Netravali, GT Mar. 90 p451-469.

Simple Procedure for Determining Cap-Plasticity-Model Parameters, Tien-Kuen Huang and Wai-Fah Chen, GT Mar. 90 p492-513.

Static Response of Sands Reinforced with Randomly Distributed Fibers, Mohamad H. Maher and Donald H. Gray, GT Nov. 90 p1661-1677.

Stress-Deformation Characteristics of Alaskan Silt, Lorraine N. Fleming and James M. Duncan, GT Mar. 90 p377-393.

Study of S_u Predicted by Pressuremeter Test, Athanacios N. Nasr and Chitta R. Gangopadhyay, GT Nov. 88 p1209-1226.

Shear stress

Alternate Analysis of Pressuremeter Test, Sayed M. Sayed, GT Dec. 89 p1769-1786.

Dynamic Fluidization of Soils, R. Richards, Jr., D. G. Elms and M. Budhu, GT May 90 p740-759.

Shear Stress-Strain Curve Generation from Simple Material Parameters, Jean H. Prevost and Catherine M. Keane, GT Aug. 90 p1255-1263.

Stress-Deformation Characteristics of Alaskan Silt, Lorraine N. Fleming and James M. Duncan, GT Mar. 90 p377-393.

Shear tests

Behavior of Laterally Loaded Bored Piles in Cemented Sands, Nabil F. Ismael, GT Nov. 90 p1678-1699.

Deformation Behavior of Sand Under Shear—Particulate Approach, Tzou-ShinmM.tGeotech. Engr.lEarth Sci. Dept., Lawrence Livermore Nat. Lab., Livermore, CA 94550; formerly, Prof., Dept. of Civil Engrg., Nat. Taiwan Univ., Taipei, Taiwan, Republic of China Ueng and Chung-Jung Lee, GT Nov. 90 p1625-1640.

Deformation-Based Model for Reinforced Sand, Scott E. Shewbridge and Nicholas Sitar, GT July 90 p1153-1170.

Dynamic Response of Sand Reinforced with Randomly Distributed Fibers, Mohamed H. Maher and Richard D. Woods, GT July 90 p1116-1131.

Shell structures

Ultimate Bearing Capacity of Triangular Shell Strip Footings on Sand, Adel Hanna and Mohamed Abd El-Rahman, GT Dec. 90 p1851-1863.

Shock waves

Laboratory Study of Compressional Liquefaction, George E. Veyera and Wayne A. Charlie, GT May 90 p790-804.

Silts

Consolidation and Permeability of Two Compacted Schist Saprolites, Olufemi Ogunsanwo, GT Aug. 90 p1250-1254.

Stress-Deformation Characteristics of Alaskan Silt, Lorraine N. Fleming and James M. Duncan, GT Mar. 90 p377-393.

Slides

Liquefaction and Flow Failure During Seismic Exploration, Roman D. Hryciw, Stan Vitton and Thomas G. Thomann, GT Dec. 90 p1881-1899.

Sliding

Retaining Walls with Sloped Heel, Michael T. Elman and Charles F. Terry, GT Oct. 88 p1194-1199.

Slip surface

Slope Stability Analysis: Generalized Approach, Dov Leshchinsky, GT May 90 p851-867.

System Reliability of Slope Stability, Yoneo Oka and Tien H. Wu, GT Aug. 90 p1185-1189.

Slope deflection method

Retaining Walls with Sloped Heel, Michael T. Elman and Charles F. Terry, GT Oct. 88 p1194-1199.

Slope stability

Kettleman Hills Waste Landfill Slope Failure. I: Liner-System Properties, James K. Mitchell, Raymond B. Seed and H. Bolton Seed, GT Apr. 90 p647-668.

Kettleman Hills Waste Landfill Slope Failure. II: Stability Analyses, Raymond B. Seed, James K. Mitchell and H. Bolton Seed, GT Apr. 90 p669-690.

Liquefaction and Flow Failure During Seismic Exploration, Roman D. Hryciw, Stan Vitton and Thomas G. Thomann, GT Dec. 90 p1881-1899.

Prediction of Progressive Failure in Heavily Overconsolidated Slope, D. V. Ramsamooj and G. S. Lin, GT Sept. 90 p1368-1380.

Slope Stability Analysis: Generalized Approach, Dov Leshchinsky, GT May 90 p851-867.

Softening of Fill Slopes Due to Moisture Infiltration, Robert W. Day and Gregory W. Axten, GT Sept. 90 p1424-1427.

System Reliability of Slope Stability, Yoneo Oka and Tien H. Wu, GT Aug. 90 p1185-1189.

Three-Dimensional Stability Analysis of Concave Slopes in Plan View, Zhang Xing, GT June 88 p658-671.

Slope stabilization

Centrifugal Modeling of Drains for Slope Stabilization, Greg S. Resnick and Dobroslav Znidarčić, GT Nov. 90 p1607-1624.

Slopes

Bearing Capacity of Foundations in Slopes, Donald Shields, Neil Chandler and Jacques Garnier, GT Mar. 90 p528-537.

Lateral Analysis of Piers Constructed on Slopes, Mohammed A. Gabr and Roy H. Borden, GT Dec. 90 p1831-1850.

Slope Stability Analysis: Generalized Approach, Dov Leshchinsky, GT May 90 p851-867.

Slots

Laboratory Testing of Filters and Slot Sizes for Relief Wells, Tarik Hadj-Hamou, Mohammed R. Tavassoli and Walter C. Sherman, GT Sept. 90 p1325-1346.

Slurries

Sedimentation of Clayey Slurry, T. S. Tan, K. Y. Yong, E. C. Leong and S. L. Lee, GT June 90 p885-898.

Soft soils

Overturning Instability, Edmund C. Hambly, GT Apr. 90 p704-709.

Settlements of Bangna-Bangpakong Highway on Soft Bangkok Clay, Dennes T. Bergado, Sayeed Ahmed, Casan L. Sampaco and A. S. Balasubramaniam, GT Jan. 90 p136-155.

Softening

Softening of Fill Slopes Due to Moisture Infiltration, Robert W. Day and Gregory W. Axten, GT Sept. 90 p1424-1427.

Soil chemistry

Critical Reappraisal of Colloidal Activity of Clays, N. S. Pandian and T. S. Nagaraj, GT Feb. 90 p285-296.

Soil classification

Classification of Marine Sediments, Iraj Noorany, GT Jan. 89 p23-37.

Soil compaction

Compaction Beneath Flexible Pavement Due to Traffic, Andrzej Sawicki and Waldemar Świdziński, GT Nov. 90 p1738-1743.

Reliability Model for Soil Liner: Post Construction, I. Bogardi, W. E. Kelly and A. Bardossy, GT Oct. 90 p1502-1520.

Soil compressibility

Constitutive Parameters Estimated by Plasticity Index, Akio Nakase, Takeshi Kamei and Osamu Kusakabe, GT July 88 p844-85.

Dynamic Replacement and Mixing of Organic Soils with Sand Charges, Kwang Wei Lo, Peng Lee Ooi and Seng-Lip Lee, GT Oct. 90 p1463-1482.

Soil consolidation tests

Influence of Structure and Composition on Residual Soils, Laurence D. Wesley, GT Apr. 90 p589-603.

Soil dilatancy

Strain Compatibility Analysis for Geosynthetics Reinforced Soil Walls, Ilan Juran, Halis M. Ider and K. Farrag, GT Feb. 90 p312-329.

Soil dynamics

Dynamic Response of Sand Reinforced with Randomly Distributed Fibers, Mohamed H. Maher and Richard D. Woods, GT July 90 p1116-1131.

Modeling Free-Field Conditions in Centrifuge Models, J. A. Cheney, R. K. Brown, N. R. Dhat and O. Y. Z. Hor, GT Sept. 90 p1347-1367.

Small-Strain-Shear Modulus of Soil by Dilatometer, Roman D. Hryciw, GT Nov. 90 p1700-1716.

Soil layers

Stiffness Coefficients of Layered Soil Systems, A. Sridharan, N. S. V. V. S. J. Gandhi and S. Suresh, GT Apr. 90 p604-624.

Soil mechanics

Behavior of Laterally Loaded Bored Piles in Cemented Sands, Nabil F. Ismael, GT Nov. 90 p1678-1699.

Dynamic Fluidization of Soils, R. Richards, Jr., D. G. Elms and M. Budhu, GT May 90 p740-759.

Estimation of Subgrade Resilient Modulus from Standard Tests, E. C. Drumm, Y. Boateng-Poku and T. Johnson Pierce, GT May 90 p774-789.

Evaluation of In Situ Effective Shear Modulus from Dispersion Measurements, Christos Vrettos and Bernd Prange, GT Oct. 90 p1581-1585.

Influence of Structure and Composition on Residual Soils, Laurence D. Wesley, GT Apr. 90 p589-603.

Pile Behavior Established from Model Tests, Robert E. Abendroth and Lowell F. Greimann, GT Apr. 90 p571-588.

Simple Procedure for Determining Cap-Plasticity-Model Parameters, Tien-Kuen Huang and Wai-Fah Chen, GT Mar. 90 p492-513.

Small-Strain-Shear Modulus of Soil by Dilatometer, Roman D. Hryciw, GT Nov. 90 p1700-1716.

Static Response of Sands Reinforced with Randomly Distributed Fibers, Mohamad H. Maher and Donald H. Gray, GT Nov. 90 p1661-1677.

System Reliability of Slope Stability, Yoneo Oka and Tien H. Wu, GT Aug. 90 p1185-1189.

Soil nailing

Kinematical Limit Analysis for Design of Soil-Nailed Structures, Ilan Juran, George Baudrand, Khalid Farrag and Victor Elias, GT Jan. 90 p54-72.

Soil permeability

Direct Determination of Permeability of Clay Under Embankment, S. Leroueil, M. Diene, F. Tavenas, M. Kabbaj and P. La Rochelle, GT June 88 p645-657.

Soil pressure

Retaining Walls with Sloped Heel, Michael T. Elman and Charles F. Terry, GT Oct. 88 p1194-1199.

Soil properties

Alternate Analysis of Pressuremeter Test, Sayed M. Sayed, GT Dec. 89 p1769-1786.

Analysis of Compressibility of Sensitive Soils, T. S. Nagaraj, B. R. S. Murthy, A. Vatsala and R. C. Joshi, GT Jan. 90 p105-118.

Critical Reappraisal of Colloidal Activity of Clays, N. S. Pandian and T. S. Nagaraj, GT Feb. 90 p285-296.

Geotechnical Properties of Cemented Volcanic Soil, T. D. O'Rourke and E. Crespo, GT Oct. 88 p1126-1147.

Hyperbolic Parameters for Compacted Soils, Marco D. Boscardin, Ernest T. Selig, Ruey-Shyan Lin and Gwo-Rong Yang, GT Jan. 90 p88-104.

One-Dimensional Loading-Rate Effects, John V. Farr, GT Jan. 90 p119-135.

Random Field Modeling of Foundation Failure Modes, Knut O. Ronold, GT Apr. 90 p554-570.

Soil samples

Analysis of Compressibility of Sensitive Soils, T. S. Nagaraj, B. R. S. Murthy, A. Vatsala and R. C. Joshi, GT Jan. 90 p105-118.

Soil sampling

Sample Disturbance of Collapsible Soil, Robert W. Day, GT Jan. 90 p158-161.

Soil, shear strength

Constitutive Parameters Estimated by Plasticity Index, Akio Nakase, Takeshi Kamei and Osamu Kusakabe, GT July 88 p844-85.

Soil stabilization

Dynamic Replacement and Mixing of Organic Soils with Sand Charges, Kwang Wei Lo, Peng Lee Ooi and Seng-Lip Lee, GT Oct. 90 p1463-1482.

One-Dimensional Consolidation With Three-Dimensional Flow for Time-Dependent Loading, K. Kurma Rao and M. Vijaya Rama Raju, GT Oct. 90 p1576-1580.

Unified Approach to Ground Improvement by Heavy Tamping, Kwang Wei Lo, Peng Lee Ooi and Seng-Lip Lee, GT Mar. 90 p514-527.

Soil strength

Analysis of Laterally Loaded Piles Embedded in Layered Frozen Soil, G. Scott Crowther, GT July 90 p1137-1152.

Strain Compatibility Analysis for Geosynthetics Reinforced Soil Walls, Ilan Juran, Halis M. Ider and K. Farrag, GT Feb. 90 p312-329.

Soil structure

Influence of Clods on the Hydraulic Conductivity of Compacted Clay, Craig H. Benson and David E. Daniel, GT Aug. 90 p1231-1248.

Influence of Structure and Composition on Residual Soils, Laurence D. Wesley, GT Apr. 90 p589-603.

Strain Compatibility Analysis for Geosynthetics Reinforced Soil Walls, Ilan Juran, Halis M. Ider and K. Farrag, GT Feb. 90 p312-329.

Soil suction

Settlement and Moisture Movement in Collapsible Soils, Mostafa El-Ehwany and Sandra L. Houston, GT Oct. 90 p1521-1535.

Soil water

Influence of Clods on the Hydraulic Conductivity of Compacted Clay, Craig H. Benson and David E. Daniel, GT Aug. 90 p1231-1248.

Modeling Field Infiltration Into Unsaturated Clay, Hywel Rhys Thomas and Stephen William Rees, GT Oct. 90 p1483-1501.

Soil water movement

Settlement and Moisture Movement in Collapsible Soils, Mostafa El-Ehwany and Sandra L. Houston, GT Oct. 90 p1521-1535.

Soil-pile interaction

Analysis of Laterally Loaded Piles Embedded in Layered Frozen Soil, G. Scott Crowther, GT July 90 p1137-1152.

Soils

Analysis of Compressibility of Sensitive Soils, T. S. Nagaraj, B. R. S. Murthy, A. Vatsala and R. C. Joshi, GT Jan. 90 p105-118.

Liquefaction Potential Map for Charleston, South Carolina, David J. Elton and Tarik Hadj-Hamou, GT Feb. 90 p244-265.

Model Prediction of Cyclic Response of Soils, D. V. Ramsamooj and A. J. Alwash, GT July 90 p1053-1072.

Reliability Model for Soil Liner: Post Construction, I. Bogardi, W. E. Kelly and A. Bardossy, GT Oct. 90 p1502-1520.

WAK Test to Find Spread Footing Stiffness, Jean-Louis Briaud and Philippe Lepert, GT Mar. 90 p415-431.

Soils, saturated

Laboratory Study of Compressional Liquefaction, George E. Veyera and Wayne A. Charlie, GT May 90 p790-804.

Minimum Undrained Strength of Two Sands, J. -M. Konrad, GT June 90 p932-947.

Thermoplasticity of Saturated Clays: Experimental Constitutive Study, T. Hueckel and G. Baldi, GT Dec. 90 p1778-1796.

Thermoplasticity of Saturated Soils and Shales: Constitutive Equations, T. Hueckel and M.tProject Leader Borsetto, GT Dec. 90 p1765-1777.

Soils, unsaturated

Modeling Field Infiltration Into Unsaturated Clay, Hywel Rhys Thomas and Stephen William Rees, GT Oct. 90 p1483-1501.

Soil-structure interaction

Bearing Capacity of Shallow Foundations: Rigid versus Flexible Models, Dov Leshchinsky and Guy F. Marcozzi, GT Nov. 90 p1750-1756.

Foundation Impedance Functions: Theory Versus Experiment, C. B. Crouse, Behnam Hushmand, J. Enrique Luco and H. L. Wong, GT Mar. 90 p432-449.

Hyperbolic Parameters for Compacted Soils, Marco D. Boscardin, Ernest T. Selig, Ruey-Shyan Lin and Gwo Rong Yang, GT Jan. 90 p88-104.

Impedances of Soil Layer with Boundary Zone, M. Novak and Y. C. Han, GT June 90 p1008-1014.

Influence of Buildings on Potential Liquefaction Damage, Kyle M. Rollins and H. Bolton Seed, GT Feb. 90 p165-185.

Rocking Compliance Functions for Rigid Bases Allowed to Uplift, Hideji Kawakami, GT May 90 p725-739.

Shear Strength Characteristics of Sand-Polymer Interfaces, T. D. O'Rourke, S. J. Druschel and A. N. Netravali, GT Mar. 90 p451-469.

Spacing

One-Dimensional Consolidation With Three-Dimensional Flow for Time-Dependent Loading, K. Kurma Rao and M. Vijaya Rama Raju, GT Oct. 90 p1576-1580.

Stability

Overturning Instability, Edmund C. Hambly, GT Apr. 90 p704-709.

Stability analysis

Kettleman Hills Waste Landfill Slope Failure. I: Liner-System Properties, James K. Mitchell, Raymond B. Seed and H. Bolton Seed, GT Apr. 90 p647-668.

Kettleman Hills Waste Landfill Slope Failure. II: Stability Analyses, Raymond B. Seed, James K. Mitchell and H. Bolton Seed, GT Apr. 90 p669-690.

Slope Stability Analysis: Generalized Approach, Dov Leshchinsky, GT May 90 p851-867.

Three-Dimensional Stability Analysis of Concave Slopes in Plan View, Zhang Xing, GT June 88 p658-671.

Stabilization

Stabilizing Compacted Clay Against Chemical Attack, Gregory P. Broderick and David E. Daniel, GT Oct. 90 p1549-1567.

Standard penetration tests

Bearing Capacity of Expanded-Base Piles in Sand, William J. Neely, GT Jan. 90 p73-87.

Bearing Capacity of Expanded-Base Piles with Compacted Concrete Shafts, William J. Neely, GT Sept. 90 p1309-1324.

Liquefaction and Flow Failure During Seismic Exploration, Roman D. Hryciw, Stan Vitton and Thomas G. Thomann, GT Dec. 90 p1881-1899.

Static loads

Analysis of Pile Groups with Variable Shaft-Load over Point-Load Ratios, José L. M. Clemente, GT Apr. 90 p692-697.

Behavior of Friction Piles in Mexico City Clay, Alberto Jaime, Miguel P. Romo and Daniel Reséndiz, GT June 90 p915-931.

Statistical analysis

Variability in Compaction Control, Iraj Noorany, GT July 90 p1132-1136.

Statistical models

Estimation of Subgrade Resilient Modulus from Standard Tests, E. C. Drumm, Y. Boateng-Poku and T. Johnson Pierce, GT May 90 p774-789.

Statistics

Reliability Model for Soil Liner: Post Construction, I. Bogardi, W. E. Kelly and A. Bardossy, GT Oct. 90 p1502-1520.

Steady state

Loading Systems, Sample Preparation, and Liquefaction, Vincent B. DeGregorio, GT May 90 p805-821.

Minimum Undrained Strength of Two Sands, J. -M. Konrad, GT June 90 p932-947.

Minimum Undrained Strength Versus Steady-State Strength of Sands, J. -M. Konrad, GT June 90 p948-963.

Steady State Testing of Loose Sands: Limiting Minimum Density, Michael F. Riemer, Raymond B. Seed, Peter G. Nicholson and Hsing-Lian Jong, GT Feb. 90 p332-337.

Steel

Distortion of Steel Tanks Due to Settlement of Their Walls, Timothy B. D'Orazio, James M. Duncan and Roy A. Bell, GT June 89 p871-890.

Steel piles

Shaft Resistance of Model Pile in Clay, Indrasurya B. Mochtar and Tuncer B. Edil, GT Nov. 88 p1227-1244.

Steel pipe piles

Lateral Load Behavior of Pile Group in Sand, Dan A. Brown, Clark Morrison and Lymon C. Reese, GT Nov. 88 p1261-1276.

Stiffness

Bearing Capacity of Shallow Foundations: Rigid versus Flexible Models, Dov Leshchinsky and Guy F. Marcozzi, GT Nov. 90 p1750-1756.

Estimation of Subgrade Resilient Modulus from Standard Tests, E. C. Drumm, Y. Boateng-Poku and T. Johnson Pierce, GT May 90 p774-789.

Impedances of Soil Layer with Boundary Zone, M. Novak and Y. C. Han, GT June 90 p1008-1014.

Stiffness and Penetration Resistance of Sands Versus State Parameter, F. Carriglio, V. N. Ghionna, M. Jamiolkowski and R. Lancellotta, GT June 90 p1015-1020.

Stiffness Coefficients of Layered Soil Systems, A. Sridharan, N. S. V. V. S. J. Gandhi and S. Suresh, GT Apr. 90 p604-624.

WAK Test to Find Spread Footing Stiffness, Jean-Louis Briaud and Philippe Lepert, GT Mar. 90 p415-431.

Strain gages

Pile Behavior Established from Model Tests, Robert E. Abendroth and Lowell F. Greimann, GT Apr. 90 p571-588.

Strain measurement

Response of Granular Soil Along Constant Stress Increment Ratio Path, Sik-Cheung Robert Lo and Ian Kenneth Lee, GT Mar. 90 p355-376.

Strain softening

Minimum Undrained Strength of Two Sands, J. -M. Konrad, GT June 90 p932-947.

Strength

Kettleman Hills Waste Landfill Slope Failure. I: Liner-System Properties, James K. Mitchell, Raymond B. Seed and H. Bolton Seed, GT Apr. 90 p647-668.

Kettleman Hills Waste Landfill Slope Failure. II: Stability Analyses, Raymond B. Seed, James K. Mitchell and H. Bolton Seed, GT Apr. 90 p669-690.

Minimum Undrained Strength of Two Sands, J. -M. Konrad, GT June 90 p932-947.

Minimum Undrained Strength Versus Steady-State Strength of Sands, J. -M. Konrad, GT June 90 p948-963.

Shale Durability Rating System Based on Loss of Shear Strength, David N. Richardson and Timothy T. Wiles, GT Dec. 90 p1864-1880.

Stress

Failure Criteria Interpretation Based on Mohr-Coulomb Friction, D. V. Griffiths, GT June 90 p986-999.

Liquefaction Potential Map for Charleston, South Carolina, David J. Elton and Tarik Hadj-Hamou, GT Feb. 90 p244-265.

Stress distribution

FEM Analysis of Elastic Stress Distributions in Embankments, Yalcin B. Acar, Hassan Hilal and Mehmet T. Tumay, GT June 88 p711-718.

Rock Mass Characterization for Dam Foundations, Brian A. Chappell, GT Apr. 90 p625-646.

Stress strain relations, soils

Double-Yield-Surface Cam-Clay Plasticity Model. I: Theory, H. S. Hsieh, E. Kavazanjian, Jr. and R. I. Borja, GT Sept. 90 p1381-1401.

Double-Yield-Surface Model. II: Implementation and Verification, R. I. Borja, H. S. Hsieh and E. Kavazanjian, Jr., GT Sept. 90 p1402-1421.

Hyperbolic Parameters for Compacted Soils, Marco D. Boscardin, Ernest T. Selig, Ruey-Shyan Lin and Gwo-Rong Yang, GT Jan. 90 p88-104.

Level Ground Soil-Liquefaction Analysis Using in Situ Properties: II, Kandiah Arulanandan and Kanthasamy K. Muraleetharan, GT July 88 p771-790.

Loading Systems, Sample Preparation, and Liquefaction, Vincent B. DeGregorio, GT May 90 p805-821.

Response of Granular Soil Along Constant Stress Increment Ratio Path, Sik-Cheung Robert Lo and Ian Kenneth Lee, GT Mar. 90 p355-376.

Stress waves

Modeling Free-Field Conditions in Centrifuge Models, J. A. Cheney, R. K. Brown, N. R. Dhat and O. Y. Z. Hor, GT Sept. 90 p1347-1367.

Stress-strain curves

One-Dimensional Loading-Rate Effects, John V. Farr, GT Jan. 90 p119-135.

Single-Hardening Model with Application to NC Clay, Poul V. Lade, GT Mar. 90 p394-414.

Structural reliability

Random Field Modeling of Foundation Failure Modes, Knut O. Ronold, GT Apr. 90 p554-570.

Reliability Analysis of Tension Pile, Knut O. Ronold, GT May 90 p760-773.

Subgrades

Finite Element Simulation of Behavior of Laterally Loaded Piles in Permafrost, A. Foriero and B. Ladanyi, GT Feb. 90 p266-284.

Subsidence

Settlements of Bangna-Bangpakong Highway on Soft Bangkok Clay, Dennes T. Bergado, Sayeed Ahmed, Casan L. Sampaco and A. S. Balasubramaniam, GT Jan. 90 p136-155.

Suction

Climate-Controlled Soil Design Parameters for Mat Foundations, R. Gordon McKeen and Lawrence D. Johnson, GT July 90 p1073-1094.

System reliability

System Reliability of Slope Stability, Yoneo Oka and Tien H. Wu, GT Aug. 90 p1185-1189.

Tanks

Distortion of Steel Tanks Due to Settlement of Their Walls, Timothy B. D'Orazio, James M. Duncan and Roy A. Bell, GT June 89 p871-890.

Temperature effects

Thermoplasticity of Saturated Clays: Experimental Constitutive Study, T. Hueckel and G. Baldi, GT Dec. 90 p1778-1796.

Thermoplasticity of Saturated Soils and Shales: Constitutive Equations, T. Hueckel and M.tProject Leader Borsetto, GT Dec. 90 p1765-1777.

Tensile strength

Geotechnical Properties of Cemented Volcanic Soil, T. D. O'Rourke and E. Crespo, GT Oct. 88 p1126-1147.

Tension

Kinematical Limit Analysis for Design of Soil-Nailed Structures, Ilan Juran, George Baudrand, Khalid Farrag and Victor Elias, GT Jan. 90 p54-72.

Strain Compatibility Analysis for Geosynthetics Reinforced Soil Walls, Ilan Juran, Halis M. Ider and K. Farrag, GT Feb. 90 p312-329.

Tension leg platforms

Reliability Analysis of Tension Pile, Knut O. Ronold, GT May 90 p760-773.

Tension structures

Reliability Analysis of Tension Pile, Knut O. Ronold, GT May 90 p760-773.

Test equipment

Evaluation of In Situ Permeability Testing Methods, Neal Fernuik and Moir Haug, GT Feb. 90 p297-311.

Testing

Shale Durability Rating System Based on Loss of Shear Strength, David N. Richardson and Timothy T. Wiles, GT Dec. 90 p1864-1880.

Tests

Particle Gradation and Liquefaction, Y. P. Vaid, J. M. Fisher, R. H. Kuerbis and D. Negussey, GT Apr. 90 p698-703.

Theories

Nonlinear Analysis of Concrete Face Rockfill Dam, Syed Khalid, Bharat Singh, G. C. Nayak and O. P. Jain, GT May 90 p822-837.

Thermoplasticity

Thermoplasticity of Saturated Clays: Experimental Constitutive Study, T. Hueckel and G. Baldi, GT Dec. 90 p1778-1796.

Thermoplasticity of Saturated Soils and Shales: Constitutive Equations, T. Hueckel and M.tProject Leader Borsetto, GT Dec. 90 p1765-1777.

Three-dimensional analysis

Three-Dimensional Stability Analysis of Concave Slopes in Plan View, Zhang Xing, GT June 88 p658-671.

Time dependence

Double-Yield-Surface Cam-Clay Plasticity Model. I: Theory, H. S. Hsieh, E. Kavazanjian, Jr. and R. I. Borja, GT Sept. 90 p1381-1401.

Double-Yield-Surface Model. II: Implementation and Verification, R. I. Borja, H. S. Hsieh and E. Kavazanjian, Jr., GT Sept. 90 p1402-1421.

One-Dimensional Consolidation With Three-Dimensional Flow for Time-Dependent Loading, K. Kurma Rao and M. Vijaya Rama Raju, GT Oct. 90 p1576-1580.

Towers

Overturning Instability, Edmund C. Hambly, GT Apr. 90 p704-709.

Traffic

Compaction Beneath Flexible Pavement Due to Traffic, Andrzej Sawicki and Waldemar Świdziński, GT Nov. 90 p1738-1743.

Transport rate

Transport of Low-Concentration Contaminants in Saturated Earthen Barriers, Yalcin B. Acar and Laique Haider, GT July 90 p1031-1052.

Triaxial compression

Hyperbolic Parameters for Compacted Soils, Marco D. Boscardin, Ernest T. Selig, Ruey-Shyan Lin and Gwo-Rong Yang, GT Jan. 90 p88-104.

Pore Pressure Behavior of K_o-Consolidated Clays, Paul W. Mayne and Harry E. Stewart, GT Nov. 88 p1340-1346.

Static Response of Sands Reinforced with Randomly Distributed Fibers, Mohamad H. Maher and Donald H. Gray, GT Nov. 90 p1661-1677.

Triaxial loads

Pore Pressure Behavior of K_o-Consolidated Clays, Paul W. Mayne and Harry E. Stewart, GT Nov. 88 p1340-1346.

Triaxial stresses

Drained Permanent Deformation of Sand Due to Cyclic Loading, Ching S. Chang and Robert V. Whitman, GT Oct. 88 p1164-1180.

Triaxial tests

Constitutive Parameters Estimated by Plasticity Index, Akio Nakase, Takeshi Kamei and Osamu Kusakabe, GT July 88 p844-85.

Evaluation of In Situ Permeability Testing Methods, Neal Fernuik and Moir Haug, GT Feb. 90 p297-311.

Influence of Structure and Composition on Residual Soils, Laurence D. Wesley, GT Apr. 90 p589-603.

Steady State Testing of Loose Sands: Limiting Minimum Density, Michael F. Riemer, Raymond B. Seed, Peter G. Nicholson and Hsing-Lian Jong, GT Feb. 90 p332-337.

Stiffness and Penetration Resistance of Sands Versus State Parameter, F. Carriglio, V. N. Ghionna, M. Jamiolkowski and R. Lancellotta, GT June 90 p1015-1020.

Stress-Deformation Characteristics of Alaskan Silt, Lorraine N. Fleming and James M. Duncan, GT Mar. 90 p377-393.

Study of S_u Predicted by Pressuremeter Test, Athanacios N. Nasr and Chitta R. Gangopadhyay, GT Nov. 88 p1209-1226.

Ultimate loads

Measured and Predicted Axial Response of 98 Piles, Jean-Louis Briaud and Larry M. Tucker, GT Sept. 88 p984-1001.

Ultimate Bearing-Capacity Tests on Sand with Clay Layer, Masanobu Oda and Soe Win, GT Dec. 90 p1902-1906.

Underwater foundations

Extraction Forces for Offshore Foundations Under Undrained Loading, William H. Craig and Keng Chua, GT May 90 p868-884.

Undrained shear tests

Minimum Undrained Strength Versus Steady-State Strength of Sands, J. -M. Konrad, GT June 90 p948-963.

Study of S_u Predicted by Pressuremeter Test, Athanacios N. Nasr and Chitta R. Gangopadhyay, GT Nov. 88 p1209-1226.

Unsaturated flow

Seismic Refraction Tests above Water Table, Guy Bonnet and Michel Meyer, GT Oct. 88 p1183-1189.

Uplift

Drained Uplift Capacity of Drilled Shafts Under Repeated Axial Loading, John P. Turner and Fred H. Kulhawy, GT Mar. 90 p470-491.

Rocking Compliance Functions for Rigid Bases Allowed to Uplift, Hideji Kawakami, GT May 90 p725-739.

Uplift pressure

Uplift Testing of Model Anchors, Weizhi Su and Richard J. Fragaszy, GT Sept. 88 p961-983.

Uplift resistance

Uplift Behavior of Horizontal Anchor Plates in Sand, Edward A. Dickin, GT Nov. 88 p1300-1317.

Velocity

Loading Systems, Sample Preparation, and Liquefaction, Vincent B. DeGregorio, GT May 90 p805-821.

Vertical drains

One-Dimensional Consolidation With Three-Dimensional Flow for Time-Dependent Loading, K. Kurma Rao and M. Vijaya Rama Raju, GT Oct. 90 p1576-1580.

Vibration

Impedances of Soil Layer with Boundary Zone, M. Novak and Y. C. Han, GT June 90 p1008-1014.

La Villita Dam Response During Five Earthquakes Including Permanent Deformation, Ahmed-Waeil M. Elgamal, Ronald F. Scott, Mohamed F. Succarieh and Liping Yan, GT Oct. 90 p1443-1462.

Vibration damping

Modeling Free-Field Conditions in Centrifuge Models, J. A. Cheney, R. K. Brown, N. R. Dhat and O. Y. Z. Hor, GT Sept. 90 p1347-1367.

Vibration tests

Evaluation of In Situ Effective Shear Modulus from Dispersion Measurements, Christos Vrettos and Bernd Prange, GT Oct. 90 p1581-1585.

Foundation Impedance Functions: Theory Versus Experiment, C. B. Crouse, Behnam Hushmand, J. Enrique Luco and H. L. Wong, GT Mar. 90 p432-449.

Stiffness Coefficients of Layered Soil Systems, A. Sridharan, N. S. V. V. S. J. Gandhi and S. Suresh, GT Apr. 90 p604-624.

Vibratory pile driving

Behavior of Vibro-Driven Piles in Sand, Cumaraswamy Vipulanandan, Daniel Wong and Michael W. O'Neill, GT Aug. 90 p1190-1209.

Laboratory Modeling of Vibro-Driven Piles, Michael W. O'Neill, Cumaraswamy Vipulanandan and Daniel Wong, GT Aug. 90 p1211-1230.

Viscoelasticity

Finite Element Simulation of Behavior of Laterally Loaded Piles in Permafrost, A. Foriero and B. Ladanyi, GT Feb. 90 p266-284.

Void ratio

Steady State Testing of Loose Sands: Limiting Minimum Density, Michael F. Riemer, Raymond B. Seed, Peter G. Nicholson and Hsing-Lian Jong, GT Feb. 90 p332-337.

Volcanic ash

Geotechnical Properties of Cemented Volcanic Soil, T. D. O'Rourke and E. Crespo, GT Oct. 88 p1126-1147.

Volume change

Alternate Analysis of Pressuremeter Test, Sayed M. Sayed, GT Dec. 89 p1769-1786.

Waste disposal

SOA: Large Strain Consolidation Predictions, F. C. Townsend and M. C. McVay, GT Feb. 90 p222-243.

Water content

Hydrocompression Settlement of Deep Fills, Thomas L. Brandon, J. Michael Duncan and William S. Gardner, GT Oct. 90 p1536-1548.

Water Content-Density Criteria for Compacted Soil Liners, David E. Daniel and Craig H. Benson, GT Dec. 90 p1811-1830.

Water flow

Laboratory Study on Leaching of a Calcareous Soil From Kuwait, Hasan Al-Sanad and Basel Al-Bader, GT Dec. 90 p1797-1809.

Water quality

Laboratory Study on Leaching of a Calcareous Soil From Kuwait, Hasan Al-Sanad and Basel Al-Bader, GT Dec. 90 p1797-1809.

Water table

Seismic Refraction Tests above Water Table, Guy Bonnet and Michel Meyer, GT Oct. 88 p1183-1189.

Wave propagation

Evaluation of In Situ Effective Shear Modulus from Dispersion Measurements, Christos Vrettos and Bernd Prange, GT Oct. 90 p1581-1585.

Small-Strain-Shear Modulus of Soil by Dilatometer, Roman D. Hryciw, GT Nov. 90 p1700-1716.

Waves

Impedances of Soil Layer with Boundary Zone, M. Novak and Y. C. Han, GT June 90 p1008-1014.

Wells

Laboratory Testing of Filters and Slot Sizes for Relief Wells, Tarik Hadj-Hamou, Mohammed R. Tavassoli and Walter C. Sherman, GT Sept. 90 p1325-1346.

Yield surface

Model Prediction of Cyclic Response of Soils, D. V. Ramsamooj and A. J. Alwash, GT July 90 p1053-1072.

Young's modulus

Hyperbolic Parameters for Compacted Soils, Marco D. Boscardin, Ernest T. Selig, Ruey-Shyan Lin and Gwo-Rong Yang, GT Jan. 90 p88-104.
